

CHAPTER 96

[Substitute House Bill No. 1153]

RADIOACTIVE MATERIALS—LICENSES TO POSSESS, MANUFACTURE,
ETC.—NOTICE OF PROPOSED LICENSE TO LOCAL GOVERNMENT

AN ACT Relating to radioactive materials; and amending section 8, chapter 207, Laws of 1961 as amended by section 5, chapter 88, Laws of 1965 and RCW 70.98.080.

Be it enacted by the Legislature of the State of Washington:

Sec. 1. Section 8, chapter 207, Laws of 1961 as amended by section 5, chapter 88, Laws of 1965 and RCW 70.98.080 are each amended to read as follows:

(1) The agency shall provide by rule or regulation for general or specific licensing of byproduct, source, special nuclear materials, or devices or equipment utilizing such materials, or other radioactive material occurring naturally or produced artificially. Such rule or regulation shall provide for amendment, suspension, or revocation of licenses. Such rule or regulation shall provide that:

(a) Each application for a specific license shall be in writing and shall state such information as the agency, by rule or regulation, may determine to be necessary to decide the technical, insurance, and financial qualifications, or any other qualification of the applicant as the agency may deem reasonable and necessary to protect the occupational and public health and safety. The agency may at any time after the filing of the application, and before the expiration of the license, require further written statements and shall make such inspections as the agency deems necessary in order to determine whether the license should be granted or denied or whether the license should be modified, suspended, or revoked. In no event shall the agency grant a specific license to any applicant who has never possessed a specific license issued by a recognized state or federal authority until the agency has conducted an inspection which insures that the applicant can meet the rules, regulations and standards adopted pursuant to this chapter. All applications and statements shall be signed by the applicant or licensee. The agency may require any applications or statements to be made under oath or affirmation;

(b) Each license shall be in such form and contain such terms and conditions as the agency may by rule or regulation prescribe;

(c) No license issued under the authority of this chapter and no right to possess or utilize sources of ionizing radiation granted by any license shall be assigned or in any manner disposed of; and

(d) The terms and conditions of all licenses shall be subject to amendment, revision, or modification by rules, regulations or orders issued in accordance with the provisions of this chapter.

(2) Before the agency issues a license to an applicant under this section, it shall give notice of such application to the chief executive officer of the incorporated city or town, if the application is for a license within an incorporated city or town, or to the county legislative authority, if the application is for a license outside the boundaries of incorporated cities or towns. The incorporated city or town, through the official or employee selected by it, or the county legislative authority or the official or employee selected by it, shall have the right to file with the agency within twenty days after date of transmittal of such notice, written objections against the applicant or against the activity for which the license is sought, and shall include with such objections a statement of all facts upon which such objections are based, and in case written objections are filed, may request and the agency may in its discretion hold a formal hearing under chapter 34.04 RCW. Upon the granting of a license under this section the agency shall send a duplicate of the license or written notification to the chief executive officer of the incorporated city or town in which the license is granted, or to the county legislative authority if the license is granted outside the boundaries of incorporated cities or towns.

This subsection shall not apply to activities conducted within the boundaries of the Hanford reservation.

(3) The agency may require registration of all sources of ionizing radiation.

~~((3))~~ (4) The agency may exempt certain sources of ionizing radiation or kinds of uses or users from the registration or licensing requirements set forth in this section when the agency makes a finding after approval of the technical advisory board that the exemption of such sources of ionizing radiation or kinds of uses or users will not constitute a significant risk to the health and safety of the public.

~~((4))~~ (5) In promulgating rules and regulations pursuant to this chapter the agency shall, insofar as practical, strive to avoid requiring dual licensing, and shall provide for such recognition of other state or federal licenses as the agency shall deem desirable, subject to such registration requirements as the agency may prescribe.

Passed the House February 6, 1984.

Passed the Senate February 24, 1984.

Approved by the Governor March 2, 1984.

Filed in Office of Secretary of State March 2, 1984.
