State of  
Washington  
House of  
Representatives

August 10, 2010

Members of the House of Representatives:

I am pleased to send you the final end-of-session report prepared by the committee staff of the House of Representatives. This "Final Summary of Legislation & Budgets Passed by the Washington State Legislature" summarizes all of the bills that passed the Legislature during the 2010 Regular and 1st Special Sessions. Budget summaries are also provided. The report includes prime sponsors, a brief summary of each measure, a brief explanation of partial vetoes, and the final status of each measure.

If you have any questions about this report or the issues raised during the session, please feel free to call committee staff. For your convenience, a committee phone list is provided in the report.

Please don't hesitate to call me if you have comments or if I can be of any assistance. I can be reached at (360) 786-7102.

Sincerely,

Ken Conte  
Staff Director  
Office of Program Research

**Summary of the  
2010 Supplemental  
Operating Budget  
(ESHB 2921 & ESSB 6444)**

**& Revenue Legislation**

# 2010 Supplemental Omnibus Budget Overview

## Operating Only

In the 2009 legislative session, the Legislature and the Governor addressed a projected Near General Fund-State budget problem of approximately \$9 billion over the three-year period between fiscal years 2009 and 2011. To solve this \$9 billion budget problem, the 2009-11 enacted budget made program and compensation reductions totaling approximately \$3.8 billion, used federal stimulus and capital budget resources, and utilized a variety of other funds to balance the operating budget.

Since the spring of 2009, revenue performance worsened and, in subsequent forecasts, the Economic and Revenue Forecast Council lowered their General Fund-State revenue projections for the 2009-11 biennium by approximately \$1.8 billion (including the impacts of revenue-related litigation). Caseload and other mandatory costs also increased by \$660 million. Those increases were primarily in state funded health care programs, such as Medicaid, and in K-12 education. Finally, litigation impacts, the cost of policy initiatives proposed during the 2010 session, and other cost pressures, resulted in \$369 million of additional costs.

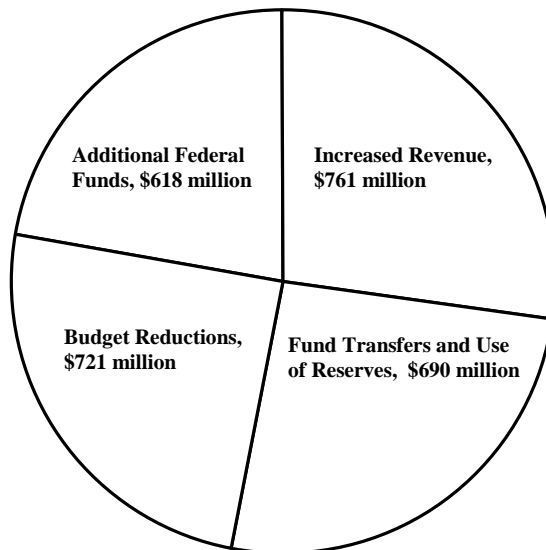

Altogether, this represented an additional \$2.8 billion shortfall compared to the budget enacted one year ago.

### How the Legislature Addressed the \$2.8 Billion Budget Problem

In Chapter 3, Laws of 2010 (ESHB 2921), Chapter 37, Laws of 2010, 1<sup>st</sup> sp.s., Partial Veto (ESSB 6444), and other fiscal related legislation passed in the 2010 session, the Legislature dealt with this shortfall. As depicted below, the steps taken by the Legislature to address this \$2.8 billion budget gap involved four main components.

### The 2010 Supplemental Budget Solution Near General Fund-State

Before Veto Actions  
(Dollars in Millions)

**Total Budget Solution = \$2.8 Billion**

*The amounts depicted do not include the \$102 million fund shift from the general fund or \$113 million in expenditures shifted out of the general fund associated with the Opportunity Pathways Account pursuant to Chapter 27, Laws of 2010, 1st sp.s., Partial Veto (E2SSB 6409).*

### **Budget Reductions – \$721 million**

In February of 2010, the Legislature enacted Chapter 3, Laws of 2010 (ESHB 2921), which reduced Near General Fund-State spending by approximately \$45 million. That legislation also imposed restrictions on state agencies related to hiring, travel, personal services contracts, and equipment.

The subsequent 2010 supplemental operating budget made additional near general fund spending reductions of approximately \$676 million. Reductions were made in virtually every area and agency of state government. Some of the major reductions included: (1) the elimination of the remaining \$79 million in Initiative 728 per student allocations to school districts; (2) \$73 million from reducing funding to institutions of higher education; (3) \$67 million in savings from legislation imposing an additional assessment on hospitals and leveraging federal match; (4) \$46 million from correctional facility capacity reductions (partially financed through a newly-created account); (5) \$39 million reduction to all areas of state government based on legislation requiring temporary layoffs; (6) \$30 million from reducing the grade 4 class size enhancement; (7) \$30 million from information technology savings; (8) \$28 million in reforming the Security Lifeline programs (formerly GA-U); and (9) \$15 million in savings by eliminating the learning improvement day for teachers.

### **Additional Federal Funds – \$618 Million**

Under the current law provisions of the federal American Recovery and Reinvestment Act (ARRA), the enhancement to the Federal Medical Assistance Percentage (FMAP), which is the share of Medicaid costs that are paid by the federal government, is set to end in December 2010. The 2010 supplemental operating budget assumes that the ARRA provisions related to increased federal support will be extended by six months (from January 1, 2011, to June 30, 2011). The proposed six-month extension has been in various pieces of proposed federal legislation and is included in President Obama's pending budget request. If enacted by Congress, this extension would allow \$480 million in federal funds to substitute for state support.

In February of 2010, the federal government announced it was revising an interpretation of how certain provisions of ARRA were being applied to selected Medicaid expenditures (the Medicare Part D Clawback). This allowed \$87 million in federal funds to take the place of state support. The 2010 supplemental operating budget also directly offset \$39 million in the Security Lifeline (formerly GA-U) and Basic Health programs in anticipation of receiving a waiver allowing a portion of those state costs to be supported with federal funds.

Including the budgeted increases in two other smaller sources of federal aid, the 2010 supplemental operating budget assumes that approximately \$618 million in additional federal resources will help address the shortfall.

### **Fund Transfers & Use of Reserves – \$690 Million**

As it passed the Legislature, the 2010 supplemental operating budget made \$461 million in additional transfers from various funds to increase near general fund resources. Some of the largest transfers to the general fund included: \$141 million from the Public Works Assistance Account; \$101 million from the Education Savings Account; \$21 million from the Job Development Account; \$18 million from the Education Construction Account; \$16 million from the Life Sciences Discovery Account; \$16 million from the State and Local Toxics Control accounts; \$15 million from the Performance Audits of Government Account; \$15 million from the Public Service Revolving Account; \$12 million from the State Treasurer's Service Account; \$10 million from the Savings Incentive Account; and \$10 million from the Insurance Commissioners Regulatory Account. The Governor vetoed the Life Sciences Discovery Account and the Insurance Commissioners Regulatory Account fund transfers. See section below.

The budget also transferred \$25 million from two lottery related accounts to the Education Legacy Trust Account.

The 2010 supplemental operating budget transferred a total of \$229 million from the Budget Stabilization Account (sometimes called the "Rainy Day Fund") to the state general fund. After these transfers, there is projected to be no ending fund balance in the Rainy Day Fund.

Including the impact of vetoes, the projected Near General Fund-State ending balance for 2009-11 is \$456 million – \$33 million less than was assumed in the budget enacted a year earlier.

### **Increased Revenue – \$761 Million**

In the 2010 session, the Legislature took a multi-pronged approach to raising additional revenue. One component was narrowing tax preferences. Another aspect of the package is related to clarifying provisions related to “economic nexus,” or the grounds for taxing out-of-state businesses with substantial activities in Washington. Finally, there are several tax rate increases, including: (1) the permanent removal of the sales tax exemption for candy; (2) the temporary removal of the sales tax exemption for bottled water; (3) a temporary increase for the tax on both carbonated beverages and beer; (4) a temporary 0.3 percent increase to the businesses and occupation tax on service businesses; and (5) increasing the tax on cigarettes and other tobacco products. Through these actions, the Legislature anticipates \$774 million in additional revenue (in addition to \$15 million from additional lottery revenues and \$10 million from the Washington State Convention and Trade Center Account included in the fund transfer section). This was partially offset by the passage of legislation that decreased revenues by approximately \$3 million.

The combined effect was an estimated net increase of \$761 million in near general fund revenues.

### **Governor's Operating Budget Vetoes**

The Governor vetoed approximately 60 sections of the operating budget passed by the Legislature. The net effect of her vetoes reduced near general fund reserves by approximately \$27 million. Operating budget vetoes include: (1) \$16 million transfer from Life Sciences Discovery Account to the state general fund; (2) \$10 million transfer from the Insurance Commissioners Regulatory Account to the state general fund; (3) \$10 million in compensation savings targeted at Washington Management Service and exempt management positions; (4) provisions that would have exempted restaurants from the liquor markup imposed based on the original 2009-11 budget and related \$5.5 million fund transfer from the state general fund; and (5) \$2.6 million appropriated for a pilot program operating in two locations and targeted at low-income adults awaiting coverage from the Basic Health Plan.

*Note: The term Near General Fund-State (NGF-S) used in this document is defined as the state general fund plus the Education Legacy Trust Account.*

# **Summary of the 2010 Supplemental Capital Budget (ESHB 2836)**

## Capital Budget

The 2010 Supplemental Capital Budget, Chapter 36, Laws of 2010, 1st Special Session, Partial Veto (ESHB 2836), appropriates \$123 million in new state debt limit general obligation bonds and \$433 million in total funds, including all appropriation increases and decreases. The current "working debt limit" is 8.75 percent to avoid the possibility of exceeding the 9 percent constitutional debt limit in case general state revenues decline, interest rates rise, and to leave capacity to address emergencies or unforeseen circumstances.

New, undedicated revenue in the amount of \$760 million for the remainder of the 2009-11 biennium allows for an additional \$141.5 million in new state debt limit bond appropriations. Approximately \$19 million in bond reductions were taken to reflect project savings.

Project savings are based on five categories: 1) Projects no longer viable because of a different community, fundraising, or organizational situation; 2) Projects completed at a lower cost than estimated at the time of funding; 3) Projects bid at a lower cost than estimated at the time of funding; 4) Projects not yet bid but estimated to be completed fifteen percent less than the construction cost estimated at the time of funding; and 5) Project management included in design projects -- funds for project management are removed but may be added back at the time of construction funding.

Approximately \$203 million in funds that are traditionally used in the capital budget were transferred to the operating budget. These transfers required existing projects to be backfilled with \$154 million in debt limit general obligation bonds.

The Office of Financial Management (OFM) is also directed to find savings in the amount of \$50 million in debt limit bonds by reducing previously approved allotments or by withholding approval of planned allotments for those projects that have not shown substantial progress. These projects include those that have failed to secure all required and appropriate transaction elements necessary to execute contracts with the administering state agency by November 30, 2010. Projects in the 2010 Supplemental Capital Budget, minor works projects, and the School Construction Assistance Grant Program are not included in the projects that OFM will consider for savings.

### **Risk Pools**

Risk pools are created within OFM and the State Board for Community and Technical Colleges to complete projects included in the 2010 Supplemental Capital Budget with reduced appropriations reflecting project savings in case those projects' savings are not as much as anticipated.

### **School Construction Assistance Grant Program**

The 2009-11 School Construction Assistance Grant Program is reduced to reflect revised assumptions regarding eligible K-12 public schools expected to request construction reimbursement for the remainder of the biennium.

### **Jobs Act for K-12 Public Schools and Higher Education Institutions**

Appropriations totaling \$100 million are provided solely for grants to public school districts and public higher education institutions for energy improvements and related projects that result in cost savings.

### **Environmental Clean Up**

Funding is provided for projects that clean up toxics sites that include storm water, contamination from Asarco, and other clean-up projects:

Clean Up Toxic Sites - Puget Sound	\$41 million
Cleanup Asarco Contamination on Vashon/Maury Islands and Mines	\$15 million
Reducing Diesel Particle Emissions in Tacoma	\$1 million
Reducing Wood Smoke Particle Emissions in Tacoma	\$600,000
Remedial Action Grant Program	\$38 million
Settlement Funding To Clean Up Toxic Sites	\$8.5 million
Storm Water Retrofit and Low-Impact Development Grant Program	\$50 million

### **Facility Closures**

The Department of Social and Health Services is provided funding for construction of new high security beds at Green Hill School and for renovation of housing units at Echo Glen School. This will allow the Juvenile Rehabilitation residents to be moved out of the Maple Lane School and to close the facility by 2013.

The Department of Corrections is provided funding to relocate the Correctional Industries furniture factory from McNeil Island to the Stafford Creek Corrections Center. In addition, funding is provided for site selection and predesign for a new prison that will allow the closure of McNeil Island.

### **Alternative Financing**

The following certificates of participation and university issued bonds are authorized in the 2010 Supplemental Capital Budget:

#### Certificates of Participation

##### **Department of Social and Health Services**

Capacity to Replace Maple Lane School \$15.9 million

##### **Department of Corrections**

Relocate McNeil Island Corrections Center Furniture Factory

# **Summary of the 2010 Supplemental Transportation Budget (ESSB 6381)**

## 2010 Supplemental Transportation Supplemental Summary

### Budget Context and Transportation Outlook

Washington State continues to feel the negative impacts of the worldwide economic recession including the continued erosion of dedicated transportation revenue. Since enactment of the 2009-11 biennial transportation budget, state transportation revenues have declined approximately \$121 million for the biennium and almost \$347 million over the course of the 16-year planning period. Fuel price increases have also contributed to the fiscal pressures.

Despite externally-driven fiscal constrictions, Washington has continued to make progress in transportation on a number of fronts:

- Of the 391 Nickel and Transportation Partnership Act projects originally authorized, 241 were completed as of February 2010, 54 were under construction, and 21 were headed for advertisement. This means that 81 percent or \$6.5 billion worth of projects have been completed or are underway.
- Furthermore, federal American Recovery and Reinvestment Act (ARRA) funding has made possible 198 state and local projects, valued at \$490 million, all of which were obligated by March 2010, meeting required federal timelines.
- In the first six months of the 2009-11 biennium, bids have come in on average 24 percent below the engineer's cost estimates. The resulting savings of about \$57 million dollars have allowed the DOT to meet the biennium-to-date inflation savings targets set by the Legislature in the underlying 2009-11 budget. Total estimated inflation savings captured by the legislature in the current biennial budget total approximately \$175 million.
- Favorable interest rates in the debt markets, along with a federal stimulus bond program with subsidized rates, have made borrowing cheaper, resulting in an expected \$195 million in long term state savings.

### Budget Summary

The 2010 Supplemental Transportation Budget makes adjustments to the underlying 2009-11 budget, resulting in \$8.5 billion in funding for transportation activities and construction in the two year period. This reflects an increase of just over \$1 billion for the biennium, primarily attributable to \$590 million in new federal grants for high speed rail, a \$35 million Transportation Infrastructure Generating Economic Recovery (TIGER) grant award, and additional revenue for the 520 corridor, made possible by the passage of ESSB 6392 and ESSB 6499.

**Washington State Patrol:** \$3.6 million is provided for a trooper basic class so that trooper staffing levels can be restored to the level prior to cancellation of the March 2009 cadet class.

**Fuel:** The budget provides just over \$33 million to reflect increases in fuel prices since the passage of the original 2009-11 budget.

Of these amounts, \$29 million is provided to the ferry system, \$2 million is provided to DOT's maintenance crews, and \$2 million is provided for the increased cost of fueling up the Washington State Patrol vehicles.

The budget also directs the State Ferry System to continue initiatives to conserve fuel and reduce the effect of price volatility on the fuel budget. The Transportation Commission may impose a fuel surcharge in Fiscal 2012.

**Ferries:** The budget continues to support the Washington State Ferries vessel delivery schedule, with the first of the Kwa-di Tabil (64-car) class to be delivered during the summer of 2010, the second scheduled for delivery in Spring of 2011 and the third for Winter of 2012. In addition, the budget provides an additional \$8.45 million to finalize detailed design work on the larger 144-auto vessels.

In an effort to balance costly terminal improvements with customer demand on Washington State Ferries, the budget provides funding for future development of a cost-effective reservation system.

**Rail:** On January 28, 2010, the Federal Rail Administration awarded to Washington State \$590 million for projects that increase passenger rail service along the Interstate 5 corridor. Projects at the top of the State's priority list that are vital to increasing rail service along the I-5 corridor include Vancouver Rail Bypass project, the Kelso to Martin's Bluff 3rd Mainline project and the Tacoma Pt. Defiance Bypass project.

The budget further provides \$2.2 million and 5.7 full time equivalent staff to ensure the receipt of these funds and implementation of the projects. The budget also includes \$2.5 million for the increasing costs of providing Amtrak service.

**Public Transportation:** An additional \$10.6 million is provided for three additional regional mobility grants from the 2009 contingency list. The grant recipients are Sound Transit as well as the cities of Seattle and Bothell.

**Stormwater:** An additional \$2.7 million is provided for the Department of Transportation to meet its obligations under its National Pollutant Discharge Elimination System permit. Funding will support the completion of planning activities and basic infrastructure investments. The Joint Legislative Audit and Review Committee is directed to review the most cost-effective way for the Department of Transportation to meet its stormwater responsibilities.

**Tolling:** With the declining purchasing power of the gas tax, tolling will play an increasing role in the finance of transportation projects. Tolls are currently only

collected on the Tacoma Narrows Bridge and the State Route 167 High Occupancy Toll (HOT) lane pilot project. The budget supports efforts under way throughout the state to prepare the way for further use of this financing tool in the future including:

- Allowing early toll revenue on the 520 Bridge to be used throughout the corridor;
- Applying toll penalty revenue to facilities where the infraction is incurred;
- Studying of potential tolling of the I-5 express lanes through Seattle; and
- Promoting a bi-state approach to tolling of the Columbia River Crossing project.

**Planning for the future:** \$2 million is provided to the Department of Transportation to begin scoping and design work for the next construction program. The Department is directed to focus its efforts on projects that:

- Offer solutions which maximize benefits to all state residents;
- Address statewide transportation policy goals; and
- Build on prior investments made in the Nickel and TPA programs.

To address future public transportation needs, the supplemental budget also provides \$350,000 to the Joint Transportation Committee to assess the capital and operating needs of transit agencies and to develop a blueprint to guide investments in public transit and to establish a plan to improve service, public access to public transit, and connectivity between public transit providers across jurisdictional boundaries.

**Highway Projects:** The budget includes investments in new emergent needs projects made possible by the receipt of federal emergency and other funds:

- \$18 million to reconstruct a portion of the SR 410 route damaged in the Nile Valley landslide;
- \$6 million in increased federal border funds, allowing DOT to work with the Whatcom Council of Governments to prioritize projects;
- \$35 million TIGER grant award for the US 395 North Spokane Corridor;
- Toll penalty revenue is added to the project plan for the SR 520 corridor;
- \$22 million in additional Rural Arterial Trust Account funding to allow additional investments in projects by the County Road Administration Board;
- \$9 million for 15 priority projects, including a number of intersection safety improvements, access road improvements, and flood reduction solutions; and
- \$400 thousand in new operating funding for electronic speed limit and lane status signs on I-5 in the Seattle area. The project is designed to improve traffic safety and highway efficiency in one of the state's busiest corridors, where collisions account for as much as 70% of congestion. Similar signs will be activated later on I-90 and SR 520.

**Compensation: Savings of \$2.3 million** is taken to reflect compensation reduction plans for non-essential employees through fiscal year 2011.
