BILL NO.	PRIME SPONSORS	SUMMARY	FINAL STATUS
EHB 1015	Pennington, Mielke, Schindler	Prohibiting Methyl Tertiary-butyl Ether as a Gasoline Additive - Prohibits the intentional addition of methyltertiary-butylether (MTBE) to fuel after December 31, 2003. Prohibits a person from knowingly mixing MTBE into gasoline above six-tenths of one percent.	C 218 L 01
SHB 1136	Schoesler, Wood, Ahern	Regarding Product Standards - Requires the director of the Department of General Administration to adopt product standards for strawboard and strawboard products for recycled product purchases made by state agencies; and adopts the U.S. Environmental Protection Agency's product standards for all building products and materials, not just building insulation, unless the director makes certain findings.	C 77 L 01
SHB 1140	Schoesler, Grant, Sump	Modifying the Taxation of Grain Warehouses - Allows a grain warehouse to report for B&O tax purposes based on either a cash receipt or accrual basis regardless of its normal accounting methods.	C 20 L 01
SHB 1163	Eickmeyer, Doumit, Rockefeller	Changing Provisions Relating to Disposal of Garbage and Junk Vehicles - Changes penalties for littering and abandoning junk vehicles in an incorporated area so that the penalties are the same as the existing penalties for the same offenses in the unincorporated portion of a county.	C 139 L 01
HB 1198	Chandler, G., Cooper	Including Drinking Water Accounts in Interest-bearing Accounts - Creates two new accounts, the drinking water assistance administrative account and the drinking water assistance repayment account, in the state treasury and authorizes these accounts to receive interest earnings.	C 141 L 01
EHB 1350	Chandler, G., Linville	Changing Water Right Appeals Procedures for Rights Subject to a General Stream Adjudication - Grants the Pollution Control Hearings Board (PCHB) authority to review decisions of the Department of Ecology regarding transfers or changes of existing water rights that are themselves subject to a general adjudication proceeding for water rights; requires appeals of the PCHB decisions to be made to the superior court conducting the general adjudication; and establishes special rules for such appeals that apply if the general adjudication proceeding was begun before October 13, 1977.	C 220 L 01
2SHB 1752	Clements, Grant, Chandler, G.	Allowing for Claims for Wildlife Damage on Rangeland Suitable for Grazing or Browsing of Domestic Livestock - Adds rangeland forage on privately owned land used for commercial grazing or browsing to the definition of "crop" as it used to describe damage caused by wildlife. Allows the Department of Fish and Wildlife to pay up to one-third of the money allocated for wildlife damage claims to the owners or lessees of rangeland livestock forage for damage caused by deer and elk. Requires 50 percent of any unspent funds allocated to pay wildlife damage claims to be used as matching grants to enhance elk and deer habitat on public lands. Requires a program review by the Joint Legislative Audit and Review Committee by January 1, 2004.	C 274 L 01

2SHB 1835	Doumit, Sump, Schoesler	Creating a Forest Products Commission - Authorizes creation of a commission for the purpose of promoting Washington forest products and managed forests, and assisting in research related to marketing, advertising, sale of forest products, or managed forests. Specifies that creation of the Forest Products Commission requires a positive vote by the required number of producers. Limits participation in the Forest Products Commission to producers who harvest timber in Washington, and pay the timber excise tax on a minimum of 2 million board feet a year or in four consecutive calendar quarters. Authorizes an assessment to be imposed upon producers within a range of 45 cents up to 90 cents per thousand board feet. Requires all assessment increases to be approved by a referendum of producers. Establishes the initial assessment rate at 57 cents per thousand board feet. Requires the initial assessment to be voted upon by the producers at the same time as the proposal to create the commission and to elect the initial commission members. Requires the commission to consist of nine voting members: six members must be from Western Washington and three members from Eastern Washington, unless there is a shortage of people willing to serve from Eastern Washington. Mandates that at least two members be from Eastern Washington.	C 314 L 01
SHB 1836	Edwards, Doumit, Sump	Creating a Legislative Task Force on Local Park and Recreation Maintenance and Operations - Establishes a legislative task force on local park and recreation maintenance and operations. Requires that membership include legislators, and representatives of cities, counties, park users, businesses, and the environment. Directs the task force to analyze local park and recreation uses and trends, anticipated needs, and possible funding sources. Requires the task force to report its findings by December 1, 2001.	C 275 L 01
HB 1846	Alexander, Hunt, Romero	Allowing the Department of Natural Resources to Sell or Exchange its Light Industrial Property in Thurston County - Authorizes the Department of Natural Resources to sell or exchange their administrative site in Lacey, Washington, and purchase or trade for a new administrative site in Thurston or adjacent counties.	C 189 L 01
EHB 1936	Quall, Morris, Linville	Allowing the Residential Owner of Land That Abuts State-Owned Shoreland to Anchor Their Boats to Adjacent Buoys - Allows the owner of residential property abutting state-owned shorelines, tidelands, or related beds of navigable waters to anchor at buoys, without charge, a boat used for private recreational purposes.	C 277 L 01
SHB 2104	Rockefeller, Sump, Pearson	Providing for an Increase in Forest Fire Protection Funds - Declares it to be state policy that the costs of fire protection for forest lands be equitably shared between forest landowner assessments and state contributions. Declares that sufficient state funds be provided so that the state will reach full funding of the TriData report recommendations. Increases the assessment for fire protection for parcels of land over fifty acres by three cents for every acre over fifty acres. Makes the increase contingent upon state funding being provided in the operating budget for forest fire protection in reference to this bill. Allows landowners who are entitled to refunds of fire assessments because they own multiple parcels in a county to file a single application with the Department of Natural Resources for calculation of the assessment owed. Summary of the 2001 Operating Budget (ESSB 6153) & Revenue Legislation

2001 SUPPLEMENTAL BUDGET HIGHLIGHTS

GENERAL FUND-STATE (DOLLARS IN THOUSANDS)	
GENERAL GOVERNMENT ¹	\$ 3,917
HUMAN SERVICES ^{2,4}	165,162
NATURAL RESOURCES ¹	6,798
PUBLIC SCHOOLS ³	16,520
HIGHER EDUCATION	700
SPECIAL APPROPRIATIONS ¹	<u>1,321</u>
TOTAL	\$194,418

THE 2001 SUPPLEMENTAL BUDGET FUNDS ONLY UNAVOIDABLE COSTS, INCLUDING:

¹ WILDFIRES FROM THE 2000 FIRE SEASON - \$10.4 MILLION

Spring and summer of the year 2000 brought an unexpected number of wildfires. Current funding levels in the Department of Natural Resources' and Military Department's budgets for wildfires were exceeded, requiring supplemental funding to cover the higher fire fighting expenses. The supplemental budget adds \$10.4 million General Fund-State, and \$6.2 million Other Funds to cover these unexpected costs.

² MEDICAL ASSISTANCE COST & CASELOAD INCREASES - \$141 MILLION

Continuing current Medical Assistance services is projected to cost an additional \$141 million General Fund-State, a 9 percent increase over amounts originally budgeted for the 1999-01 biennium. Increased expenditures are due to increasing caseloads for entitlement programs and higher costs per person served. The number of individuals covered by Medical Assistance programs in fiscal year 2001 is projected to grow by approximately 36,000, or 5 percent over the original estimate. An additional \$23 million of TANF money is provided to pay for higher medical costs incurred during the first year of the biennium.

³ ENROLLMENT INCREASES - \$16.5 MILLION

Public school enrollments have increased and additional needs in the areas of pupil transportation and special education require supplemental funding. The supplemental budget includes an additional \$16.5 million GF-S to continue to provide the same level of educational opportunities to the children of our state.

⁴ MENTAL HEALTH, DD AND GAU CASELOAD - \$12.8 MILLION

Caseload levels in current state programs for mental health, developmental disabilities and general assistance-unemployable were increased by the February 2001 Caseload Forecast Council. The supplemental budget includes an additional \$12.8 million GF-S to continue the current levels of service for these programs.

2001-03 Omnibus Operating Budget Overview

2001-03 Operating Budget Overview

The 2001 Legislature was confronted with a difficult fiscal situation created by the resurgence of rapid health care cost increases, the passage of two initiatives with large fiscal impacts, a slowdown in the economy, and a major earthquake. Budget pressures were mitigated somewhat from savings in the cost of the state's pension systems and a large one-time increase in federal revenues.

The 2001-03 operating budget was adopted in the second extraordinary session. The state general fund for 2001-03 is \$22.8 billion, an 8.3 percent increase over the 1999-01 general fund appropriation. The total fund operating budget for 2001-03 is \$43.4 billion, a 13.1 percent increase over the 1999-01 budget.

Health Care Costs

The Legislature enacted a supplemental budget to the 1999-01 biennial appropriation of \$195 million, of which \$141 million was for the medical assistance program in the Department of Social and Health Services. The medical assistance supplemental appropriation represents nearly a 17 percent increase in the estimated expenditures for fiscal year 2001 over the 2000 session appropriation level. These increased cost were reflected in the 2001-3 biennium medical assistance appropriation, an increase of \$437 million over the 1999-01 appropriation level.

An additional \$131 million was appropriated to pay for the increased cost of health care benefits for public school, higher education, and other state employees.

Ballot Initiatives

In November 2000, two initiatives passed with large impacts on the state general fund. Initiative 728 diverts \$470 million in the 2001-03 biennium from the state general fund to a new student achievement account and the education construction account. The funds are to be used by local school districts to reduce class size, provide extended learning, and other specified purposes.

Initiative 732 requires cost of living increases (COLA's) for public school employees and some community college employees equal to the Seattle consumer price index (CPI). The fiscal year 2002 COLA provided by the budget is 3.7 percent. The budget includes funds for an estimated 3.1 percent COLA in fiscal year 2003; however, no rate for fiscal year 2003 is specified in the budget because the second year CPI will be not be known until the end of calendar year 2001. \$348 million is appropriated for these COLAs.

Economic Slowdown

General fund revenue for the 2001-03 biennium is forecast to increase only 3.8 percent over the 1999-01 biennium. Although not a recession-level growth rate, this is the slowest revenue growth since the 1991-93 biennium. When general fund revenue diverted from the passage of I-728 and the phase out of the estate tax mandated by Congress is factored in, revenue for fiscal year 2002 is forecast to actually decrease from the previous fiscal year. Revenue growth in fiscal year 2003 is forecast to increase by 4.8 percent, close to average general fund revenue growth.

The Nisqually Earthquake

On February 28, 2001 a magnitude 6.8 earthquake centered less than 15 miles from the capitol struck the state. In the omnibus 2001-03 operating budget, the 2001 supplemental to the 1999-01 operating budget, and in other legislation, \$77.3 million from the emergency reserve account and \$168 million of federal matching funds from FEMA were appropriated for earthquake recovery purposes.

Pension Changes

\$315 million in general fund state savings were realized through reductions in state pension contributions. \$198 million of savings were realized through the passage of SB 6167, which raised the long term investment return assumption for pensions from 7.5 percent to 8 percent and slipped the date for full funding of the two pension funds with unfunded liabilities back to June 30, 2024. The outcome of the 1999 valuation studies of pension assets resulted in the remainder of the pension savings.

The operating budget includes \$125 million in appropriations from the State Surplus Assets Reserve Account. This account was created to receive funds that were to be generated by restructuring the Law Enforcement Officers and Fire Fighters 1 pension plan (LEOFF). The LEOFF 1 pension has assets in excess of what is needed to fully fund the pension obligation to all beneficiaries. The bill restructuring the LEOFF 1 pension plan did not pass and there are no revenues to support these appropriations.

Additional Federal Revenues

The Nursing Home Proportionate Share program (ProShare) is a Washington state program that uses payments to public hospitals operating nursing homes to generate additional federal Medicaid revenues. These additional federal revenues are returned to the state and are available to support any state activity. In May, the Department of Social and Health Services completed additional data collection and analysis that concluded that an additional \$450 million would be available by the end of the 2001-03 biennium. These funds are to be deposited in the Health Services Account. \$150 million is transferred from the Health Service Account to the state general fund.

Spending Limit

General fund expenditures are subject to the spending limit created in Initiative 601. In the 2000 legislative session, the calculation of the spending limit was amended to allow for an increase in the limit when revenues or expenditures are transferred into the general fund. The budget transfers \$220 million: \$150 million from the Health Services Account and \$70 million from the Multi Modal Account. These transfers and other budget adjustments increase the I-601 spending limit by \$426 million for the biennium. The 2001-03 general fund appropriation is \$67 million below the adjusted spending limit. These transfers are reflected in the unrestricted ending fund balance.

LEGISLATIVE AGENCIES

Appropriations to legislative agencies provide carryforward funding for statutory duties, as well as enhancements in selected areas.

Senate and House of Representatives

Funding is provided to continue support to the Legislative Ethics Board and to Project Citizen, a program to promote government participation by middle school students.

Joint Legislative Audit and Review Committee

Funding is provided for studies of a variety of state programs, including developmental disabilities programs, the State School for the Deaf, water conservancy boards, and children's mental health services.

JUDICIAL AGENCIES

Court of Appeals

The amount of \$327,000 is provided to make compensation adjustments for Court of Appeals' staff based on recruitment and retention difficulties, new duties assigned, or salary inversion or compression. The Court of Appeals will determine the specific positions to receive an increase based on these factors.

Funding in the amount of \$159,000 is provided for costs associated with enhancing courtroom security and remodeling a bathroom in the Division III facility in Spokane.

Office of the Administrator for the Courts

A total of \$17.9 million is provided to maintain and upgrade the judicial information system. The Office of the Administrator for the Courts is in the process of converting many applications from mainframe to web-based environments. Included in the total appropriation is \$410,000 that is provided for purchasing audio recording, courtroom presentation, and video conferencing equipment for all divisions of the Court of Appeals and for replacing the audio system at Division I in Seattle.

The amount of \$1,618,000 is provided for increasing juror pay. The Office of the Administrator for the Courts may contract with local governments to provide additional juror pay. The contract shall provide that the local government is responsible for the first \$10 of juror compensation for each day or partial day of jury service, and the state shall reimburse the local government for any additional compensation, excluding the first day, up to a maximum of \$15 per day.

A total of \$750,000 is provided for enhancements to certain judicial programs as determined by the Office of the Administrator for the Courts in consultation with the Supreme Court. Unified family courts are among the programs that may be funded from this appropriation.

Office of Public Defense

A total of \$600,000 is provided to continue a pilot program through June 30, 2002, to improve defense services provided for parents involved in dependency and termination hearings. An evaluation of the pilot project is due by February 1, 2002.

Funding in the amount of \$235,000 is provided for the Office of Public Defense to contract with an existing public defender association to establish a Capital Defense Assistance Center. The center will provide training and assistance to defense attorneys involved in capital offense cases.

Extraordinary Criminal Justice

A total of \$975,000 is provided for financial assistance to Franklin, Klickitat, Cowlitz, Skagit, Yakima, Thurston, and Spokane counties for extraordinary criminal justice costs incurred in the adjudication of aggravated homicide cases.

GENERAL GOVERNMENT AGENCIES

Department of Community, Trade, and Economic Development

The amount of \$1 million is provided for the acquisition of equipment to preserve donated perishable goods. These funds are in addition to the existing level of state food assistance of \$7.4 million per biennium.

The amount of \$200,000 is provided to assist industrial workers who have been displaced by energy-related plant closures in rural counties. Grants will be provided to meet the displaced workers' basic needs including, but not limited to, emergency medical and dental services, family and mental health counseling, food, energy costs, mortgage, and rental costs.

An additional \$880,000 is provided for community-based legal advocates to assist sexual assault victims with both civil and criminal justice issues.

Utilities and Transportation Commission

Following the passage of the Washington State Pipeline Safety Act of 2000, funding is provided for the Utilities and Transportation Commission to implement an interstate and intrastate natural gas and hazardous liquid pipeline safety program.

Military Department

The budget provides \$37.9 million in state funds and \$157.8 million in federal funds for costs associated with the response and recovery activities as a result of the February 28, 2001, earthquake. The funding provided is sufficient to cover the entire state match for state agency costs and one-half of the local match required for Federal Emergency Management Agency reimbursement.

DEPARTMENT OF SOCIAL AND HEALTH SERVICES

Children and Family Services

The budget provides \$12.2 million in state and federal funding to reduce the caseworker ratio from the current 29:1 to 24:1.

The budget increases the basic rate paid to foster parents from the current average of \$405 per month to \$420 on July 1, 2001, and to \$440 on July 1, 2002. This increase will cost \$3.8 million in state and federal funding over the biennium.

The budget expands the use of private child placing agencies and increases the rate paid to them for placement services. The cost for these enhancements is \$5.7 million in state and federal funding.

The budget provides \$2.1 million (\$2.0 million state general fund) to increase the availability of respite care for foster parents. The expansion of respite care is intended to increase the retention of foster parents.

Funding for the Family Policy Council (FPC) and Community Health and Safety Network Grants is reduced by 25 percent in the budget. This saves \$2.2 million in the state general fund. The FPC is to implement reductions in network grants so that programs and networks with the best outcomes and history of substantial contract compliance are maintained.

Juvenile Rehabilitation Administration

Due to recent assessments of the number of youth with mental health issues in Juvenile Rehabilitation Administration facilities, \$1.1 million is provided for increased mental health staffing at the Maple Lane School and increased medication management resources to address workload associated with the increased usage of psychotropic medications.

Savings of \$1.6 million are achieved by implementing efficiencies in the administration of regional services programs in the community. Regional services include parole services, community facilities, drug and alcohol services, learning and life skills centers, regional support staff, regional administration, and diagnostics. Additionally, the opening of a recently constructed 64-bed unit at Green Hill School will be delayed until the second year of the biennium, saving \$812,000.

The Juvenile Rehabilitation Administration currently contracts with county detention centers to provide short-term residential programming for juvenile offenders in the community commitment program. The Governor vetoed the community commitment program proviso, and therefore \$3 million in county detention contract funding lapses.

Mental Health

To keep pace with the growth in the number of persons enrolled in Medicaid, total funding for counseling, case management, residential and hospital care, and other community mental health services provided through Regional Support Networks is increased by \$48.5 million (7.8 percent). In addition, the appropriations act directs the department to phase in a new formula for allocating available resources among the Regional Support Networks over the next six years. The new formula will use the number of low-income persons enrolled in state medical assistance programs, rather than total population, as the primary measure of the relative need for state funding in each Regional Support Network area. The budget also provides \$500,000 of state and federal funding for completion of additional studies to assess whether medical assistance enrollment is an adequate and sufficient measure of the relative prevalence of mental illness across the state.

Two new efforts are initiated to measure and evaluate the performance of the community mental health system. First, a total of \$822,000 is provided for development of an improved management information system that will track common system outcomes – such as homelessness, criminal justice system involvement, employment status, and frequency of hospitalization – across all of the Regional Support Networks. Second, a total of \$75,000 is provided for the Washington State Institute of Public Policy to begin a longitudinal study that will track the status of mental health consumers for a period of at least ten years.

A total of \$5.7 million is provided for development of community residential and support services for persons who no longer require active psychiatric treatment in an inpatient hospital setting, but whose treatment needs constitute substantial barriers to community placement. The effort is expected to permit closure of four state hospital wards over the course of the 2001-03 biennium, resulting in a net savings of \$3.5 million in state funds. A total of \$7.2 million is provided to increase staffing at the two state psychiatric hospitals in order to provide improved care for two groups of patients: those with developmental disabilities and those involved with the criminal justice system.

Pursuant to Chapter 12, Laws of 2001, 2nd sp.s. (E3SSB 6151), a community transition program will be established at an existing facility on McNeil Island. The budget provides \$5.8 million for the operating costs associated with the program that is designed for Special Commitment Center residents that have progressed enough in their treatment plans to be suitable for this type of less restrictive alternative. An additional \$2 million is provided to compensate local jurisdictions impacted by the placement of the facility.

A total of \$2.5 million is provided to implement the plan adopted for the Special Commitment Center to satisfy the United States District Court's rulings. Enhancements to the program include: the establishment of a vocational program; the adoption of a preventative health program; the establishment of another Assistant Resident Manager position to help cover evening hours; and the development of a tracking system to collect resident information, treatment progress, and other activities designed to assist residents in achieving successful treatment.

Developmental Disabilities

Building upon the Division's past efforts to enable integrated community living, the budget provides a total of \$8.3 million (\$4.3 million state general fund) for community residential placements and corresponding support services for up to 80 individuals who chose to transition from state residential habilitation centers (RHCs). Funding for these placements is consistent with the Division's overall planning related to the U.S. Supreme Court decision in the *L.C. v. Olmstead* case. As a result of these moves plus normal attrition, a total of \$7.3 million (\$3.3 million state general fund) is anticipated in savings due to the consolidation of vacancies in RHC cottages.

The budget provides \$8.7 million for residential housing and supports for the following groups of individuals with developmental disabilities and community protection issues: those being released by the Department of Corrections; those in crisis using statewide diversion beds; and those in state psychiatric hospitals.

The sum of \$2.0 million from the state general fund is provided in the Developmental Disabilities Division budget for job training and placement, or other productive daytime activities, for young people with disabilities who are expected to graduate from special education programs during the 2001-03 biennium.

The budget provides \$24.3 million in state and federal funding to workers who earn less than \$10 per hour and provide direct care to persons with developmental disabilities who live in their own homes or in community residential placements. When combined with the vendor rate increase provided for in the budget, most workers will receive a 50 cent increase in their hourly compensation over the biennium.

A total of \$5.9 million (\$3.3 million state general fund) is provided to improve the case manager to client ratio for developmentally disabled clients enrolled in the Medicaid Home and Community-Based Waiver (CAP Waiver). A total of 48 caseworkers will be added over the 2001-03 biennium. The additional staff will be used to ensure better monitoring of client health and safety.

Long-Term Care Services

The budget provides a total of \$2.1 billion so that an average of 47,000 people per month may receive long-term care in their own homes, assisted living facilities, adult family homes, and nursing homes. This is a 6.8 percent increase in the number of people receiving such services, and a 12 percent increase in total expenditures, from the 1999-01 level.

A total of \$27.6 million is provided to increase compensation for low-wage workers who provide direct care for persons in their own homes and in adult family homes, assisted living facilities, and nursing homes. An additional \$5.6 million is appropriated to provide health insurance for additional homecare workers, and to cover increased health insurance costs.

In accordance with Chapter 8, Laws of 2001, 1st sp.s., Partial Veto (SHB 2242), a total of \$80.6 million is provided to increase nursing home payment rates. Nursing home payment rates will increase an average of 4.4 percent per year, including the impact of the low-wage worker increase.

Funding is also provided to enhance or to increase access to long-term care services in the community. The budget provides \$1.5 million for exceptional care rates so that persons with Alzheimer's disease or related dementias who might otherwise require nursing home care may instead reside in community boarding facilities specializing in their

care. A total of \$910,000 is provided to increase skilled nursing visits for persons receiving in-home care. Chapter 269, Laws of 2001 (SHB 1341), is expected to enable 1,100 people to qualify for publicly-funded, community-based long-term care, while still saving approximately \$1 million because an estimated 375 of these individuals would otherwise be served in nursing facilities, at greater public expense. Admissions to the chore services program are to be frozen effective July 1, 2001, for an anticipated savings of \$1.5 million by the end of the biennium.

Economic Services Administration

The budget increases funding for subsidized childcare and other WorkFirst programs by \$29 million. The funding is from the federal Temporary Assistance for Needy Families block grant and the Child Care Development block grant.

The budget saves \$6.6 million in state general funds by shifting from federal to state, the administration of state supplemental payments for persons on the federal Supplemental Security Income program. The shift would occur in the second year of the biennium and is expected to save \$16-18 million per biennium once fully implemented.

The budget reduces funding by \$3 million (\$2 million in state general fund) in anticipation of savings resulting from the streamlining of processes to determine and review eligibility for income assistance programs. The savings will reduce staffing by 275 positions by the end of the 2001-03 biennium.

Alcohol and Substance Abuse

The budget provides \$2.9 million from the Public Safety and Education Account for drug and alcohol treatment for persons on the Supplemental Security Income (SSI) Program. Preliminary data show that providing drug and alcohol treatment for SSI clients with indications of drug and alcohol problems saves money in the Medical Assistance Program. The estimated savings in medical services is \$5.6 million state general fund.

The budget provides \$3.2 million from the state general fund for a 35-bed chemical dependency involuntary treatment (CDIT) facility in eastern Washington. This facility will ease the pressure on the one CDIT facility in western Washington and help reduce the repeated use of emergency rooms, jails, and psychiatric hospitals by persons whose intoxication makes them a danger to themselves or others.

The budget provides \$2.8 million from the Public Safety and Education Account for drug and alcohol treatment for persons gravely disabled from their addictions, including those who are addicted to methamphetamines.

Funding is provided for additional drug courts that are exhausting their federal grants in the 2001-03 biennium. The budget funds half of the lost federal money for five additional counties, for a total cost to the Public Safety and Education Account of \$1.1 million. The balance of drug court funding is expected to come from savings at the local level.

Medical Assistance

The 2001-03 budget provides a total of \$5.8 billion in state and federal funds for an average of about 835,000 persons per month to receive medical, dental, and vision care through Medicaid and other DSHS medical assistance programs. Total expenditures on such services are budgeted to increase by \$983 million (20 percent) from the 1999-01 level, and the state share of those expenditures is projected to increase by \$497 million (24 percent). The number of people receiving state medical assistance is expected to be 8 percent higher in 2001-03 than in 1999-01, and the average cost per person served is budgeted to grow by 12 percent.

The increase in the cost per person served would be greater except for certain cost-control measures anticipated in the budget. The Department of Social and Health Services is directed to develop and implement utilization- and cost-management strategies which are expected to prevent at least \$90 million of cost increases which would otherwise occur in state medical assistance programs. The budget also anticipates that the federal government will enact a Medicare prescription drug program, resulting in a \$34 million savings in prescription drug expenditures by the state Medicaid program during the second year of the biennium.

The impact of Medical Assistance cost increases on state taxpayers is also expected to be mitigated by new federal law and regulations regarding the disproportionate share hospital and Medicare upper payment limit programs. Changes to those programs are expected to result in an additional \$350 million of federal revenues into the Health Services Account during the 2001-03 biennium. These revenues are used in the budget to cover cost increases in the Basic Health Plan and in Medicaid coverage for low-income children; to provide an additional \$7 million to public hospitals to reduce the impact of uncompensated care; to enroll without a waiting period all eligible children who apply for coverage under the State Children's Health Insurance Program, which serves families with incomes between 200-250 percent of poverty; and to extend Medicaid eligibility to two additional groups of recipients. The newly-covered groups are uninsured women with incomes below 200 percent of poverty who have been diagnosed with breast or cervical cancer; and persons with incomes below 450 percent of poverty who go to work despite having disabilities severe enough to qualify for social security disability coverage.

Vocational Rehabilitation

General fund-State support for the Vocational Rehabilitation Program is increased by \$2.6 million (8.2 percent). As a result, Washington will be able to collect the full amount of federal matching funds expected to be available during the 2001-03 biennium.

OTHER HUMAN SERVICES AGENCIES

Basic Health Plan

A total of \$496 million is provided from the Health Services Account for operation of the Basic Health Plan. This is an \$82 million (20 percent) increase from the 1999-01 level, due to escalation in the rates charged by managed care plans to provide coverage for Basic Health enrollees. The total increase would be greater, but \$26.5 million of state costs are avoided by limiting enrollment to 125,000 persons per month, rather than 133,000 as originally planned. Additionally, the amount which enrollees are required to contribute toward the cost of their prescriptions is increased by \$2, for an anticipated savings of \$2.6 million.

Criminal Justice Training Commission

The budget provides funding for a variety of activities at the state and local levels to address methamphetamine issues. In the Criminal Justice Training Commission's budget, \$233,000 is provided to train and equip local law enforcement personnel to respond to clandestine drug labs.

Funding in the amount of \$450,000 is provided for the Washington Association of Sheriffs and Police Chiefs to implement school mapping, or electronic pre-incident plans, for K-12 schools. Additionally, \$65,000 is provided to establish regionalized training programs for school district and local law enforcement officials on school safety issues.

The budget provides \$374,000 for the implementation of Chapter 167, Laws of 2001 (HB 1062), which establishes a certification and de-certification process for police officers in the state.

Department of Labor and Industries

The budget provides a total of \$11 million from the Accident Account and Medical Aid Account for six technology improvement projects. These projects will improve claims collections, assess the feasibility of filing claims over the Internet, allow for payment of premiums over the Internet, improve the system that calculates pension benefits, develop a new system for collection and analysis of worker safety and health data, and allow for registration and licensing of electrical contractors over the Internet.

Funding for the crime victims compensation program is increased by \$3 million from the Public Safety and Education Account.

The budget provides \$2.9 million of one-time funding for the increased cost of calculating injured workers' benefits under a recent state Supreme Court ruling (Cockle). This funding, from the Accident Account and Medical Aid Account, is provided for fiscal year 2002. The department is required to propose legislation that would provide greater certainty and simplicity in calculating benefits.

The budget reduces \$10 million in Medical Aid Account funding for the occupational health and safety grant program.

Department of Health

A total of \$10.6 million is appropriated to provide the new pneumococcal conjugate vaccine to all children under the age of two. The vaccine has been determined effective in the prevention of middle-ear infections, sinus infections, and meningitis among young children.

Funding for the state's comprehensive effort to reduce tobacco use is increased by \$5 million over the biennium, for a total of \$17.5 million per year.

New grants totaling \$1.6 million will be provided to assist local jurisdictions in assuring the safety of very small drinking water systems. Additionally, \$1.2 million is provided to monitor and assist larger systems in complying with increased standards mandated by the federal Safe Drinking Water Act.

Funding for the AIDS Prescription Drug Program is increased by \$1.8 million to keep pace with enrollment in the program, which is expected to grow by 14 percent per year.

Department of Veterans' Affairs

A total of \$11 million is provided to establish and operate a state veterans' home in Spokane. This will be the first time the state has operated a veterans' facility in eastern Washington. The department will also reconfigure 65 beds at the two western Washington facilities to provide a higher level of care. Increased federal revenues and resident contributions, resulting in a \$0.6 million savings in state-fund expenditures, will offset the cost of this reconfiguration.

Department of Corrections

A total of \$12.5 million is provided for the second phase of a project to replace the Offender-Based Tracking System with the new Offender Management Network Information (OMNI) system. The department expects OMNI to improve reporting capabilities, reduce data entry efforts, and redirect staff time towards offender supervision. The total estimated cost of the replacement project is \$44 million.

Funding in the amount of \$12.9 million is provided to implement Chapter 196, Laws of 1999 (Offender Accountability Act), which made a variety of changes to the supervision of offenders in the community. With this increase, the budget provides approximately \$21.2 million for costs associated with the Offender Accountability Act in the 2001-03 biennium.

In the budget reductions submitted to the Governor, the department identified a variety of steps that could result in cost savings. The budget assumes many of these efficiencies. Savings in the amount of \$5.8 million are achieved by: transferring female youthful offenders to a Juvenile Rehabilitation Administration facility; reducing goods and services expenditures; lease-purchasing equipment with longer life cycles; modifying the reimbursement schedule for the inpatient treatment of offenders in hospitals; and reducing facility maintenance activities.

Savings of \$1.2 million are achieved through the elimination of staffed law libraries. The department will continue to contract with private attorneys and law firms to provide legal counsel to offenders.

Services for the Blind

An additional \$270,000 is provided for technological devices that will assist people with visual impairments in getting and keeping jobs. State financial assistance is increased by \$100,000 (25 percent) for the center that provides comprehensive services for persons who are both deaf and blind.

Sentencing Guidelines Commission

The budget provides \$78,000 for the Sentencing Guidelines Commission to conduct a comprehensive review and evaluation of state sentencing policy. The review and evaluation will include an analysis of whether current sentencing policies are consistent with the purposes of the Sentencing Reform Act and with prison capacity. In addition, the review and evaluation will consider studies on the cost-effectiveness of sentencing alternatives, as well as the fiscal impact of sentencing policies on state and local government.

Employment Security

The budget provides authority to spend \$3.2 million of one-time federal funding to improve the unemployment insurance program. Funds will be used to pay off the telecenter debt and improve telecenter operations, make corrections to the department's benefit and tax systems, and improve other agency technology.

NATURAL RESOURCES

Salmon and Water

In the 2001-2003 biennium new funding is provided for salmon recovery and associated water resources projects and programs. The capital budget provides \$133.2 million and the operating budget provides \$66.4 million in funding for these salmon and water programs. Descriptions of significant new programs or enhancements are organized according to the Statewide Strategy to Recovery Salmon.

Salmon Recovery Grant Funding

The capital budget provides \$54.6 million (\$27.6 million general fund-Federal and \$27 million in state bonds) to the Salmon Recovery Funding (SRF) Board for grants for salmon restoration projects and activities. These funds will be allocated to the highest priority projects across the state to remove fish passage barriers, restore fish habitat, reduce water quality degradation and support community based restoration efforts. The operating budget provides \$358,000 in federal funds and 1.8 FTEs for administration of the SRF Board.

Watershed-Based Planning

The operating budget provides \$4.5 million from the general fund for the Department of Fish and Wildlife to continue to provide grants and technical assistance to lead entities that recommend salmon habitat improvement and restoration projects for funding by the Salmon Recovery Funding Board. \$3.1 million from the Water Quality Account and 3.5 FTEs is provided to the Department of Ecology to make grants for watershed assessments and to provide technical assistance to local watershed planning groups. The budget also provides \$1 million from the Water Quality Account to the Department of Fish and Wildlife for grants to watershed groups that develop regional salmon recovery plans.

Limiting Factors Analysis

The operating budget provides \$1.6 million from the Water Quality Account for the Conservation Commission to complete the remaining limiting factors analyses that support lead entity decisions.

Statewide Monitoring Strategy

The operating budget provides \$1.5 million (\$500,000 each from the general fund, Water Quality Account and State Toxics Control Account) to the Interagency Committee on Outdoor Recreation to coordinate natural resources agencies in developing a monitoring strategy that can be used to evaluate the effectiveness of salmon recovery efforts.

Salmon Science and Monitoring

Department of Fish and Wildlife conducts salmon-related inventory, monitoring and basic science research. The operating budget provides \$1.5 million from the general fund for the salmonid stock inventory and smolt production monitoring.

Enhanced Streamflow Monitoring

The operating budget provides \$1.6 million (\$500,000 from the general fund, \$564,000 from the Drought Preparedness Account and \$549,000 from the Water Quality Account) and 2.0 FTEs for the Department of Ecology to provide equipment and training for local entities to monitor stream flows in additional basins where low stream flows may create critical limitations for trout and salmon.

Salmon Recovery Pesticide Strategy

The operating budget provides \$830,000 from the State Toxics Control Account and 4.5 FTEs for the Department of Agriculture to implement a pesticide monitoring strategy program intended to enable the state, the federal Environmental Protection Agency, and citizens following state law to be exempt from the prohibition on “take” under the Endangered Species Act.

Agriculture-Fish-Water Negotiations

Farmers, environmental groups and federal and state agencies are negotiating agricultural practices that will protect salmon and their habitat and ensure viable agricultural industry. The operating budget provides \$500,000 from the Water Quality Account for the Conservation Commission to make grants to these stakeholders to enable their continued participation in the Agriculture, Fish, and Water negotiations.

Lower Skykomish Habitat Conservation Plan

The operating budget provides \$250,000 from the general fund for the Department of Fish and Wildlife to make a grant to the Lower Skykomish Habitat Conservation Group to develop a salmon habitat conservation plan for the lower Skykomish River. If approved by the federal agencies implementing the ESA, the HCP would be among the first with a focus on agricultural practices.

Forest Practice Regulation and Small Landowner Riparian Easements

The state Forest Practices Board has revised forest practice rules to protect salmon and water in accordance with Chapter 4, Laws of 1999, 1st sp.s., (ESHB 2091 – Forest Practices). The operating budget provides \$13 million (\$2.5 million from the general fund, \$625,000 from the Salmon Recovery Account, \$2.9 million from the Water Quality Account, and \$7 million in federal funds) and 11.1 FTEs to the Department of Natural Resources to implement the Forest and Fish Agreement. The capital budget provides \$2.2 million in state bonds to purchase riparian easements from small timber owners to mitigate the economic impact of the rules.

Trust Land Road Improvements

The operating budget provides \$3.8 million in trust management funds and 20.2 FTEs for the Department of Natural Resources to upgrade roads on trust lands to meet the requirements of the Forest and Fish Agreement. Poorly designed or constructed forest roads pose a threat to fish and water resources.

Growth management Updates

The operating budget provides \$3 million from the general fund to the Department of Community Trade and Economic Development to make grants to local government to help pay the costs to update local critical area ordinances.

Sharing Costs to Manage Stormwater

The operating budget provides \$1 million from the State Toxics Control Account for the Department of Ecology to assist local governments implementation of the new Environmental Protection Agency Phase II Stormwater requirements.

Water Rights Purchase and Irrigation Efficiencies

Irrigation activities may pose threats to fish through improper water withdrawals from surface and ground waters and wasting water through poorly functioning irrigation facilities. The capital budget provides the following funding for the Department of Ecology: \$3.4 million from state bonds for water measuring devices and gauges; \$9 million (\$4 million from Referendum 38 bonds and \$5 million from the Water Quality Account) to make grants for water irrigation efficiencies through which conserved water will be placed in the trust water rights program; and \$7 million (\$1 million from state bonds and \$6 million in federal funds) to purchase or lease water rights.

Water Rights Changes

The operating budget provides \$3 million each from the general fund and the Water Quality Account and 27 FTEs to the Department of Ecology to implement Chapter 237, Laws of 2001 (SHB 1832 – Water Resource Management) and to process applications for changes and transfers of existing water rights.

Drought Response

In March 2001 the Governor declared a drought emergency. The operating budget provides \$5 million (\$564,000 from the Emergency Water Projects Account and \$4.4 million from the Drought Preparedness Account) for the Department of Ecology to purchase and lease water in response to low instream flows due to the drought and to expedite processing of water right change and transfer applications.

Instream Flows

The operating budget provides \$600,000 from the Water Quality Account to the Department of Ecology to set instream flows in basins not subject to planning under the Watershed Planning Act.

Fish Screen Compliance

The Department of Fish and Wildlife is provided \$600,000 in the operating budget for cooperative compliance programs for fish passage and \$5 million (\$1.5 million from state bonds and \$3.5 million in federal funds) in the capital budget to install fish screens and fish ways.

Salmon License Buy-back

Continuing the implementation of the U.S.-Canada salmon treaty, the state provides a 25 percent match to federal funds appropriated for commercial salmon fishing license buybacks. The operating budget provides \$1.3 million from the general fund to match \$5 million in federal funds.

Fish and Wildlife Facility Retrofit and Enhancement

Improperly designed hatcheries, fish blockages and failing road systems on the Department of Fish and Wildlife lands pose threats to ESA-listed salmon and trout species and may violate water quality standards. The capital budget provides \$5.8 million from various state funds and \$24.3 million in federal funds to the department to bring its lands and facilities into compliance with the ESA and the Clean Water Act.

NATURAL RESOURCES AGENCIES**Department of Ecology****Clean Sites Initiative**

The operating budget provides \$9.3 million from the State Toxics Control Account for the Department of Ecology to clean up sites contaminated by toxic chemicals that present a serious threat to human health and the environment.

Persistent Bioaccumulative Toxics Strategy

Persistent, bioaccumulative toxic chemicals (PBTs) have been linked to a wide range of toxic effects in fish, wildlife and humans. The operating budget provides \$800,000 from the State Toxics Control Account to the Department of Ecology to conduct baseline monitoring and develop chemical-specific action plans to reduce PBTs in the environment.

Preventing Oil Spills

The operating budget provides \$1.7 million from the general fund to the Department of Ecology to establish a charter safety tug service that includes the placement of a rescue tug at Neah Bay for at least 200 days during fiscal year 2002. Under the charter safety tug service, the department authorizes the U.S. Coast Guard to dispatch tug services throughout the state when weather or other conditions increase the risk of an oil spill. The budget also provides \$280,000 of the Oil Spill Prevention Account for the department to study the feasibility of a tracking system using transponders and advanced radar technology and to access vessel incident reporting information from the federal government.

Area-Wide Contamination

The operating budget provides \$1.2 million from the State Toxics Control Account for the Department of Ecology to develop a strategy to address emergent area-wide soil contamination problems including arsenic contamination in Everett and Tacoma and arsenic-contaminated orchards in eastern Washington.

Department of Natural Resources

Enhanced Fire Protection

A century of forest management that emphasized aggressive suppression of all fires has contributed to a pattern of frequent, catastrophic fires. In addition, increasing residential development in rural forested areas increases the frequency of fires in the wild land-urban interface and makes fire suppression more expensive. With an additional \$9.8 million from the general fund and 24 FTEs in the operating budget, the Department of Natural Resources fire protection program will add staff, increase training and purchase additional equipment.

Public Use and Natural Area Stewardship

The operating budget provides \$925,000 from both the general fund and the Aquatic Lands Enhancement Account to the Department of Natural Resources to maintain recreational access to state trust lands open for public use, maintain natural area preserves and natural resources conservation areas, and, where appropriate, enhance public access to natural areas.

State Parks

Maintenance Backlog

The operating budget provides \$4 million from the general fund and 7.5 FTEs to preserve and maintain the state park system, with an emphasis on projects that protect health and safety.

Management and Visitor Safety

The operating budget provides \$1.7 million from the general fund and 9.0 FTEs to State Parks to staff recent Park acquisitions and to hire additional rangers to focus on park personnel and visitor safety.

Abandoned Orchards

The operating budget provides \$450,000 from the State Toxics Control Account and \$450,000 from non-appropriated funds for the Department of Agriculture to reimburse county horticulture pest and disease boards for the costs of addressing problems from abandoned orchards. Failure to control pests in abandoned orchards threatens adjacent operating farms.

Agriculture Marketing

The operating budget provides \$850,000 from the general fund and 1.5 FTEs to the Department of Agriculture to promote Washington agricultural products, develop a small farm direct marketing program and to reduce trade barriers. These funds will be matched by industry contributions and federal grants.

Agricultural Fairs and Youth Shows

ESSB 5237 (Fair Fund) makes annual transfers of \$2 million from the General fund to the fair fund, creating a stable funding source for the more than 70 agricultural fairs and youth shows.

Spartina Eradication

The operating budget provides \$1.4 million from the Aquatic Lands Enhancement Account for the Department of Agriculture to begin a spartina eradication program in Puget Sound and in Willapa Bay

TRANSPORTATION

The majority of funding for transportation services is included in the transportation budget, not in the omnibus appropriations act. The omnibus appropriations act includes only a portion of the funding for the Department of Licensing and the Washington State Patrol. Therefore, the notes contained in this section are limited. For additional information on transportation funding, please see the Transportation Budget and Special Appropriations sections of this document.

Department of Licensing

A total of \$924,000 is provided for information technology upgrades and improvements. Many of the improvements are designed to offer business and professional licensing services over the Internet. In addition to the \$924,000, the Department of Licensing may also seek funding for the general fund portion of its technology projects by applying to the Department of Information Services for a share of funds from the \$7.5 million combined technology pool. This \$7.5 million pool is a competitive information technology pool for state executive branch agencies.

An amount of \$125,000 is provided for costs associated with a half-time management analyst position and contracted psychometrician services to allow the Private Investigator Program to revise licensing tests to meet statutory requirements. The budget also includes \$107,000 for additional costs associated with adjudicative proceedings in the Security Guard licensing program.

Washington State Patrol

Funding is provided for a variety of activities at the state and local levels to address methamphetamine issues. In the Washington State Patrol's (WSP) budget, \$1.4 million is provided to: add two staff to the full-time methamphetamine response team; enhance the ability of the crime labs to assist in the investigation of clandestine lab operations; and establish a Training and Education Resource Center to provide information to government agencies, businesses, and individuals in dealing with methamphetamine issues.

A total of \$607,000 is provided for ongoing staff support for the Washington State Identification System, the Washington Crime Information Center, and the Sex Offender Registry systems, which have been integrated into a single system known as "W2" that allows criminal justice and other users to get information concerning an offender from one place at any time. Additionally, the budget includes \$328,000 to allow WSP to implement a criminal intelligence index that provides 24-hour access to intelligence information for all criminal justice agencies.

In the 1998 legislative session, certain activities and portions of programs within WSP were transferred to the operating budget from the transportation budget. Beginning in fiscal year 2003, these activities are transferred back to the transportation budget. This \$12.6 million transfer is predicated upon the enactment of new transportation revenue by fiscal year 2003.

K-12 PUBLIC EDUCATION

Compensation

Initiative 732 Cost-of-Living Adjustments (COLAs) – \$318.0 million General Fund-State

Funds are provided to implement Initiative 732 to provide annual COLAs for state-funded teachers and staff in public schools. The COLA is based on the Seattle consumer price index and provides an increase of 3.7 percent for the 2001-02 school year. Another increase for the 2002-03 school year will be provided, with the specific rate to be specified by the 2002 Legislature consistent with the provisions of Initiative 732.

Salary increases for non-state funded staff are expected to come from the source of funds for the salaries. For example, increases for levy-funded staff are to be paid from levy funds.

Health Benefit Increases – \$80.6 million General Fund-State

Funds are provided to increase the 2000-01 school year health benefit rate allocation per full-time equivalent (FTE) employee from \$425.89 to \$455.27 per month for 2001-02, and to \$493.59 per month for 2002-03. These increases are comparable to the increases provided to state employees.

Pension Rate Changes – \$136.8 million General Fund-State Savings

Effective July 1, 2001, the employer contribution rates for the Public Employees' Retirement System (PERS) and the School Employees' Retirement System are reduced from 3.21 percent to 1.54 percent. Effective September 1, 2001, the employer contribution rate for the Teachers' Retirement System (TRS) is reduced from 5.38 percent to 2.75 percent. These rates are set in accordance with Chapter 11, Laws of 2001, 2nd sp.s., Partial Veto (ESSB 6167 – State Retirement Systems), which increases the long-term actuarial assumptions for future wage growth and investment returns, and re-establishes the June 30, 2024, deadline for funding all of the liabilities of PERS Plan 1 and TRS Plan 1.

Class Room Resources/Lower Class Size

Initiative 728 – \$393.3 million Student Achievement Fund, \$76.7 million Education Construction Account

Initiative 728 requires a portion of lottery revenues, a portion of state property taxes with established dollar per student amounts, and excess emergency reserve funds to be deposited into the newly created Student Achievement Fund and the Education Construction Account.

Deposits to the Student Achievement Fund are expected to total \$393.3 million. The funds will be distributed to school districts at a rate of \$193.92 per FTE student for the 2001-02 school year and \$220.59 per FTE student for the 2002-03 school year. The permissible uses of this fund are: smaller classes in grades K-4; smaller classes for certain grade 5-12 classes; extended learning opportunities in grades K-12; professional development for educators; early childhood programs; and building improvements or additions to support class size reductions or extended learning programs.

The \$76.7 million of Education Construction Account moneys are appropriated in the capital budget and are used for K-12 and higher education school construction.

K-4 Class Size/Extended Learning – \$85.7 million General Fund-State Savings

Funds are provided to continue the Better Schools class-size and extended learning component. The Better Schools Program is eliminated and the K-4 class size funds are transferred to the Apportionment Program. This transfer consolidates multiple funding sources for grades K-4 staffing allocations into one program. This component continues funding for the additional 2.2 certificated instructional staff per 1,000 FTE students for class size reduction and extended learning purposes in grades K-4. These funds are not considered part of the state's basic education allocation.

Continuing Education Reform and School Improvement**Reading Corps – \$7.8 million General Fund-State**

Funds are provided for Reading Corps grants for schools in which significant numbers of students in grades K-6 do not perform well on reading assessments. The reading programs may be provided before, during, or after the school day, and on Saturdays, summer, intercessions, or other vacation periods. The grants are to be used for proven, research-based programs provided by mentors or tutors and must include pre- and post- testing to determine the effectiveness of the programs.

Focused Assistance – \$2.8 million General Fund-State

Funding is provided to the Office of the Superintendent of Public Instruction to conduct educational audits of low-performing schools and to enter into performance agreements to implement the recommendations of the audit and the community. Each educational audit will include recommendations for best practices and ways to address identified needs.

Mentor/Beginning Teacher Assistance Expansion – \$2.5 million General Fund-State

Funding for teacher mentoring is increased from \$3.4 million per year to \$4.7 million per year. Up to \$200,000 per year may be used for a mentor teacher academy.

Alternative Teacher Certification Routes – \$2.0 million General Fund-State

Funds are provided to implement Chapter 158, Laws of 2001 (E2SSB 5695 – Alternative Teacher Certification). The bill creates two grant programs: one providing stipends for alternative teacher candidates and teacher mentors; and the other, conditional scholarships providing forgivable loans to alternative teacher candidates if they teach in Washington public schools.

Math Helping Corps Expansion – \$1.7 million General Fund-State

Funds are provided to expand the Math Helping Corps from the current \$2.0 million to \$3.7 million. The purpose of the Math Helping Corps is to provide assistance to school districts having difficulties meeting the math standards under education reform.

Principal Leadership Development Expansion – \$1.0 million General Fund-State

Funds are provided to expand the Principal Leadership Development Program from the current \$250,000 to \$1.25 million. Principals participating in the program will establish a growth plan in coordination with an assigned mentor who will monitor and assist the principal in achieving the desired professional growth.

State Leadership for School Improvement – \$768,000 General Fund-State

Funding and staff previously allocated to the Center for the Improvement of Student Learning are redirected for the Superintendent to assist schools in implementing high academic standards, aligning curriculum with these standards, and training teachers to use assessments to improve student learning. Funds may also be used to increase community and parental awareness of education reform.

Web-Based Instructional Network – \$260,000 General Fund-State

Funding is provided for the development and posting of web-based instructional tools, assessment data, and other information that assists schools and teachers in implementing higher academic standards.

National Teacher Certification Bonus – \$241,000 General Fund-State

Funds are provided to increase the duration of the \$3,500 annual bonus for attaining national teacher certification from the current two years to three years.

School Safety

School Safety Allocation Increase – \$6.1 million General Fund-State

Funds are provided for a school safety allocation to school districts at a rate of \$6.36 per student per year. The total biennial allocation for school safety is \$12.1 million and can be used to create and implement school safety plans.

Anti-Bullying/Harassment Training – \$500,000 General Fund-State

Funds are provided to the Office of the Superintendent of Public Instruction to create a model policy that school districts can use as a guide for training programs.

Non-Violence Leadership Training – \$300,000 General Fund-State

Funds are provided for a non-violence leadership training program offered by the Institute for Community Leadership headquartered in Seattle. The program consists of school-based workshops that use reading, writing, listening, and public speaking to build character and to develop skills for a changing society. The funds are expected to provide up to 80 percent funding for workshops serving 12 school districts and 36 schools.

School Safety Training – \$216,000 General Fund-State

Funds are provided to implement a school safety training program for school administrators and school safety personnel provided by the Criminal Justice Training Commission.

School Safety Center – \$200,000 General Fund-State

Funds are provided to establish a School Safety Center located in the Office of the Superintendent of Public Instruction. The main functions of the safety office are to provide model comprehensive school safety plans to schools and to provide assistance to schools in developing and implementing comprehensive safe school plans.

Other Enhancements

Increase the Special Education Enrollment Maximum – \$2.9 million General Fund-State

Starting with the 2002-03 school year, funds are provided to increase the percentage of a school district's FTE enrollment funded as special education from the current maximum of 12.7 percent to 13.0 percent.

LASER Science Program – \$1.7 million General Fund-State

Funds are provided for the LASER Science Program. Under the program, the Superintendent of Public Instruction will contract with the Pacific Science Center for a statewide program coordinator and the initial purchase of science kits for districts that participate in the LASER Program. Districts participating in the LASER Program write a five-year strategic plan for implementing a science education program for grades K-8 and provide professional development for teachers and administrators.

OSPI Information Systems – \$700,000 General Fund-State

Funding is provided to upgrade information systems in the Office of the Superintendent of Public Instruction. Priority will be given to upgrading the general apportionment system and continuing work on the student information system.

Savings and Reductions

Better Schools Program Staff Development – \$40.2 million General Fund-State Savings

The staff development portion of the Better Schools Program created by the 2000 Legislature is not continued.

Block Grant – \$17.6 million General Fund-State Savings

The block grant allocation per student is reduced from \$28.81 per K-12 student per year to \$18.48 per student. Block grant funds are discretionary funds that can be used by school districts for any educational purpose.

Traffic Safety Education – \$8.1 million General Fund-State Savings

Beginning with the 2001-02 school year, the state subsidy of \$137 per student for the driver education program is eliminated. The subsidy of \$203.97 is continued for driver education students eligible for free and reduced-price lunches.

Washington Assessment of Student Learning (WASL) Adjustments – \$6.3 million General Fund-State Savings

Various budget adjustments are made for the WASLs based on the following: savings of \$285,000 from reduction in the number of advisory committee members used to develop the WASLs; \$300,000 in savings from separating the question and answer booklets which reduces scoring costs; \$415,000 in efficiency savings and other adjustments; and availability and utilization of at least \$1.0 million of federal funds in fiscal year 2002 and at least \$2.0 million in fiscal year 2003. Including state and federal funds, the change in assessment timelines and double scoring, this budget increases WASL funding from \$19.9 million to \$25.1 million for the 2001-03 biennium.

Statewide Programs – \$3.8 million General Fund-State Savings

The allocation for statewide programs is reduced by \$3.8 million. Statewide programs include a number of health and safety, technology, and grant and allocation programs amounting to \$36.7 million.

Information Technology Workforce Training – \$3.6 million General Fund-State Savings

Funding is eliminated for information technology workforce training grants. This grant program was initiated by the 1999 Legislature to prepare students to achieve information technology skill certifications. School districts receiving the grants used them to acquire computer software and hardware, improve Internet access, and provide staff training.

Magnet Schools – \$1.6 million General Fund-State Savings

Funding for the Magnet School Program is eliminated. The purpose of this program was to provide funds to certain school districts with large minority populations to establish magnet programs to encourage racial integration of schools through voluntary student transfers.

Discontinue the Center For the Improvement of Student Learning (CISL) – \$1.3 million General Fund-State Savings

CISL, located in the Office of the Superintendent of Public Instruction, is eliminated. The purpose of the Center is to serve as a clearinghouse for information regarding educational improvement and parental involvement programs. The funds and staff are transferred to other similar functions in the office.

State Office Administrative Reductions – \$680,000 General Fund-State Savings

The administration budget of the Superintendent of Public Instruction is reduced by 3 percent through administrative efficiencies and reductions at the state office.

Geographic Alliance – \$100,000 General Fund-State Savings

State funding for the geographic alliance is eliminated. The purpose of the program was to train K-12 teachers to improve the teaching of geography in schools.

HIGHER EDUCATION

Enrollment Increases

The amount of \$31.3 million from the state general fund is provided to address increasing enrollment demand. Access to public higher education is expanded to accommodate an additional 3,575 full-time equivalent (FTE) student enrollments: 435 enrollments in the baccalaureate institutions and 3,140 enrollments in the community and technical colleges. Included in these totals are 239 new enrollments to expand the supply of college graduates and trainees in computer science, network engineering, software systems, and information technology, 140 of which are earmarked to accelerate the preparation of students with the math and science credits necessary to transfer to a new state technology institution operating at the University of Washington-Tacoma.

Other Support for New Enrollments

The sum of \$2 million from the state general fund is provided to develop new training programs in rural counties and other communities adversely impacted by job reductions and industry dislocation – particularly due to rapid changes in the price of energy. Another \$1.1 million from the state general fund supports the operation of the North Snohomish, Island, and Skagit (NSIS) higher education consortium. The Jefferson County demonstration project to improve access to post-secondary education for adults living in remote areas is renewed with \$350,000 from the state general fund. Students from migrant and seasonal farm-working families will receive assistance in the transition from high school to college through a new state grant program at the Higher Education Coordinating Board.

Applied Research

The Spokane Intercollegiate Research and Technology Institute receives a direct appropriation of \$3 million from the general fund to support its operations. The University of Washington and Washington State University each receive an additional \$300,000 from the state general fund for faculty research projects to advance the development of new technologies.

Compensation

Most higher education employees will receive a 3.7 percent cost-of-living adjustment (COLA) effective July 1, 2001. Funding is also provided for a second COLA in fiscal year 2003 in an amount to be determined by the 2002 Legislature, consistent with the provisions of Initiative 732 for academic employees and technical college employees. Additionally, the community and technical colleges receive \$7.5 million from the state general fund to address part-time faculty salary disparity and \$3.5 million from the state general fund for faculty salary increments.

Financial Aid

A total of \$33 million from the state general fund is appropriated to increase student financial aid through State Need Grant, Promise Scholarship, and State Work Study programs. The sum of \$1 million from the state general fund remains in the budget to renew conditional loans to classified K-12 employees seeking to become classroom teachers through a demonstration project at the Higher Education Coordinating Board.

Tuition Policy

Governing boards of each institution and the State Board for Community and Technical Colleges are granted authority to increase tuition rates with caps set by the Legislature. For undergraduate and most graduate students, the maximum increase for academic year 2001-02 is 6.7 percent and for academic year 2002-03 is 6.1 percent. Tuition fees for law and graduate business programs may not increase more than 12 percent a year except at the University of Washington where the maximum increase for graduate business programs is 15 percent for academic year 2001-02 and 20 percent for academic year 2002-03. For adult basic education classes, the Legislature intends that a minimum of \$5.00 a credit hour be charged except for students of limited income. The Governor vetoed this fee directive.

OTHER EDUCATION

Arts Commission

The amount of \$500,000 is provided to increase grants for arts programs at the local level and improve access to the arts for all residents in Washington.

Washington State Historical Society

In preparation for the Lewis and Clark Trail Bicentennial in 2004, \$375,000 is provided for the Washington State Historical Society to work with local communities, tribal governments, neighboring states, and the National Bicentennial Council to plan local events and community education programs. Ongoing funding of \$325,000 is provided to the State Parks and Recreation Commission for additional full-time equivalent staff for the Lewis and Clark Interpretive Center at Fort Canby.

Through the capital budget, \$1 million will be distributed to local and tribal governments for interpretive projects identified by the Lewis and Clark Bicentennial Advisory Committee under the auspices of the Washington State Historical Society. Fort Canby and Sacagawea State Parks will each receive \$1 million through the State Parks and Recreation Commission to renovate facilities and enhance exhibits at their respective Lewis and Clark Trail interpretive centers.

Eastern Washington State Historical Society

The budget provides \$447,000 for a staff increase for the Northwest Museum of Arts and Culture (formerly the Cheney Cowles Museum) expansion slated for completion in late 2001. The additional staff will help the Eastern Washington State Historical Society enhance and expand exhibits, display more of the museum's permanent collections, feature regional and national collections, and offer more interactive learning environments.

SPECIAL APPROPRIATIONS

Initiative-695 Assistance to Public Health Districts, Cities, and Counties

The budget provides funding of \$192 million for assistance to public health districts, cities, and counties to address the impacts of I-695. This funding continues the legislative intent set forth in the 2000 supplemental budget, which was affirmed by the legislative task force, for partial backfill of public health and local government losses due to I-695 with state resources. An increase in funding is provided at the Initiative 601 growth rate.

Ferry Assistance

The sum of \$30 million from the State Surplus Assets Account is appropriated to the Puget Sound Ferry Operations Account to support ferry operations in the 2001-03 biennium. Legislation (SB 6166) creating the State Surplus Assets Account from restructuring the LEOFF 1 retirement system did not pass leaving no money in the account to pay for the ferry operations.

Technology Pool

Funding is provided for a competitive information technology pool for state executive branch agencies, excluding schools and institutions of higher education. Agencies may apply to the Department of Information Services to receive a share of these funds. Funds are to be distributed to state agencies by the Office of Financial Management (OFM). OFM shall not distribute funding unless specific operational budget savings are identified for any ongoing operating costs resulting from the information technology project.

Torts

The amount of \$6.4 million is appropriated from the state general fund and \$25 million from the State Surplus Assets Reserve Account for deposit into the Liability Account to pay increased costs associated with tort claims and tort defense. These appropriations are in addition to \$38 million for tort costs that is incorporated as increases in state agencies' revolving fund charges for the 2001-03 biennium and an additional \$75 million that is already included in the state's base budget for tort claims and tort defense. Legislation (SB 6166) creating the State Surplus Assets Account from restructuring the LEOFF 1 retirement system did not pass leaving no money in the account to support the \$25 million appropriation. The transportation budget did not fund \$13 million of the revolving fund charges to the Department of Transportation, further reducing the total available funding level.

EMPLOYEE COMPENSATION

State Employees Cost-of-Living Adjustment (COLA) – \$115.1 million General Fund-State

To offset expected inflation, the budget funds an across-the-board salary increase of 3.7 percent on July 1, 2001. Funding is also provided for an increase for fiscal year 2003, in an amount to be determined by the 2002 Legislature. The budget includes a total of \$629 million from the state general fund to provide COLAs for all employee groups and vendors: \$115 million for state agencies; \$107 million for higher education; \$318 million for K-12; and \$89 million for vendors.

Recruitment and Retention Priorities – \$27.5 million General Fund-State

The budget provides funding for the nine highest priority salary increase proposals adopted by the WPRB as part of the “6767” process. The job classes that will receive increases effective January 1, 2002, include: Psychiatrists, Psychologists, Information Technology positions, Forensic Scientists, Social Workers, Campus Police, Financial Classifications, Insurance Examiners, Registered Nurses, and Licensed Practical Nurses.

Assistant Attorneys General – \$3.1 million General Fund-State, \$3.1 million Other Funds

The budget provides funding to increase beginning salaries, to provide merit-based salary increases, and to address recruitment and retention problems in certain specialty areas of practice, such as torts, revenue, utilities, and other high-demand fields.

Health Benefits

State Agency Employee Health Benefits Cost Increases – \$27.2 million General Fund-State

The budget increases the monthly state contribution for health insurance and related benefits for state agency and higher education employees from a current level of \$436.16 to \$457.29 in fiscal year 2002 and to \$497.69 in fiscal year 2003, an increase of \$61.53 over two years, or 14 percent. This funding level reflects the following expected changes in state employee health benefits:

- Increases in employee co-payments for ambulance service, emergency room visits, and in-patient and out-patient hospital care;
- Elimination of double premium payments to health plans where married employees are both state employees; and
- An increase in the employee share of the total monthly contributions for health insurance related benefits. The current employee premiums pay about 6 percent of the cost of the total benefit package; this would increase to about 8 percent in 2002 and to 10 percent in 2003.

The average state employee premium would be expected to increase from about \$28 per month to \$52 per month in calendar year 2002 and to \$58 in 2003. The funding level assumes no increase in the current \$10 co-pay for office visits and no changes to the current pharmacy benefit co-pays.

In addition to the \$27 million from the general fund provided to state agencies for health insurance funding rate increases, an additional \$23 million was provided to higher education institutions and \$81 million to K-12 for such increases.

Pensions

Pension Contribution Rate Adjustments

The budget includes reductions in employer and state contributions for the Public Employees' Retirement System (PERS), School Employees' Retirement System, Teachers' Retirement System (TRS), and Law Enforcement Officers' and Fire Fighters' (LEOFF) Retirement System Plan 2 – contained in Chapter 11, Laws of 2001, 2nd sp.s., Partial Veto (ESSB 6167). The new funding provisions increase the long-term salary growth assumption to 4.5 percent and the long-term investment return assumption to 8 percent; re-establishes the June 30, 2024, target date for full funding all PERS Plan 1 and TRS Plan 1 liabilities; and provides a four-year period for smoothing investment gains and losses.

The changes to the state's long-term economic assumptions bring the state's assumptions for pension funding into closer alignment with the average assumptions used by the majority of other state retirement plans. These changes will result in \$198 million total state general fund savings: \$136.8 million for K-12, and \$11.5 million in higher education, \$8 million in LEOFF Plan 2, and \$35 million in state agencies.

As a result of the 1999 valuation studies and the changes in the long-term economic assumptions, the member contribution rate for PERS Plan 2 will be reduced by 1.55 percent of pay, from 2.43 percent to 0.88 percent. The TRS Plan 2 rate will be reduced by 1.78 percent, from 3.01 percent to 1.23 percent.

Summary of Governor's Vetoes in the 2001-03 Operating Budget

General Fund Cash Deficit: Section 2

This section would have required the Governor, in the event of a projected general fund cash deficit, to first make across the board allotment reductions and then submit a supplemental budget request making program reductions. The supplemental budget would first propose the use of the emergency reserve funds prior to proposing any general fund tax increases.

Performance Audits - State Auditor: Section 123 (3)

This proviso, in State Auditor's budget, would have included \$600,000 for the auditor to conduct three demonstration performance audits of three governmental entities.

Contracted Beds at County Juvenile Detention Facilities- DSHS Juvenile Rehabilitation Program: Section 203 (1)(s)

This subsection would have required DSHS to contract with local county detention facilities for these (33) beds and the beds were not to be considered when reducing JRA bed capacity.

Safety and Health Grants - Department of Labor and Industries: Section 217 (4)

This subsection would have prohibited the Department of Labor and Industries from expending funds for occupational safety and health impact grants unless specific legislation is passed that specifically authorizes such expenditures, appropriates funds, and provides accountability for the program.

Culvert Removal on Rocky Ford Creek - Department of Ecology: Section 302 (15)

This proviso would have earmarked \$50,000 for the Conservation District in the Moses Lake region to remove the culvert on the Rocky Ford Creek.

Washington Watershed, Science, and Technology Program - Department of Ecology: Section 302 (16)

This proviso would have earmarked \$300,000 for the Conservation Commission for the Washington Watershed, Science, and Technology Program to provide technical assistance to private landowners in conducting water quality monitoring, riparian vegetation management, and noxious weed control.

Palouse Conservation District Pilot Project - Department of Ecology: Section 302 (17)

This proviso would have earmarked \$750,000 for the Conservation District in the Palouse region for a pilot project to evaluate the ability of existing voluntary and regulatory programs to improve water quality under the federal clean water act.

Trust Land Roads - Department of Natural Resources: Section 308 (6)

This subsection would have restricted the use of the access road revolving fund to activities on trust land roads to meet the requirements of the forests and fish agreement.
