

DRAFT

The Circumstances of Families after Time Limits *Adults and Children Terminated from TANF in February 2011*

By DSHS Economic Services Administration (ESA) and DSHS Research and Data Analysis Division (RDA)

WHILE FEDERAL LAW PROHIBITS states from using TANF block grant funds to provide assistance to most families in which an adult is included in the TANF cash grant for longer than 60 months, it allows states flexibility in designing time limit policies. States can adopt a shorter time limit, exempt certain categories of recipients from the time limit, and grant extensions of benefits to certain families that reach the time limit. Due to fiscal constraints, the Department of Social and Health Services narrowed who qualifies for TANF time limit extensions in February 2011. With this change, fewer families in Washington State are now eligible for continued TANF cash benefits after 60 months (see WAC 388-484 and 388-310-0350).

In January 2012, the Department of Social and Health Services completed a ‘first look’ analysis¹ of the circumstances of the families affected by the change in time limit policy. The analysis focused on about 13,000 children and adults who were terminated from TANF due to time limits in February 2011 and did not return to TANF through November 2011 – looking at Basic Food receipt, enrollment in medical assistance, self-reported homelessness and subsidized housing receipt (as recorded by ESA caseworkers in the Automated Client Eligibility System, or ACES), and receipt of emergency housing assistance (as recorded in the Department of Commerce’s Homeless Management Information System or HMIS).² The study period for the ‘first look’ analysis was February through November 2011.

This update looks at the circumstances of these families and children through June 2012 (16 months after they left TANF due to the time limit) and expands analyses to include child welfare involvement.

Summary

While the majority of the children and adults who were terminated due to time limits in February 2011 continued to receive Basic Food and medical coverage in the ensuing 16 months, the proportions receiving these benefits declined gradually over time. By June 2012, roughly 89 percent of these children and adults continued to receive Basic Food and 89 percent of the children but only 69 percent of the adults still received medical assistance. Receipt of subsidized housing presumably through local housing authorities, as reported within the Automated Client Eligibility System, remained relatively constant throughout the 16 months after the termination of TANF benefits—with slightly over 40 percent of children and about 35 percent of adults continuing to receive subsidized housing.

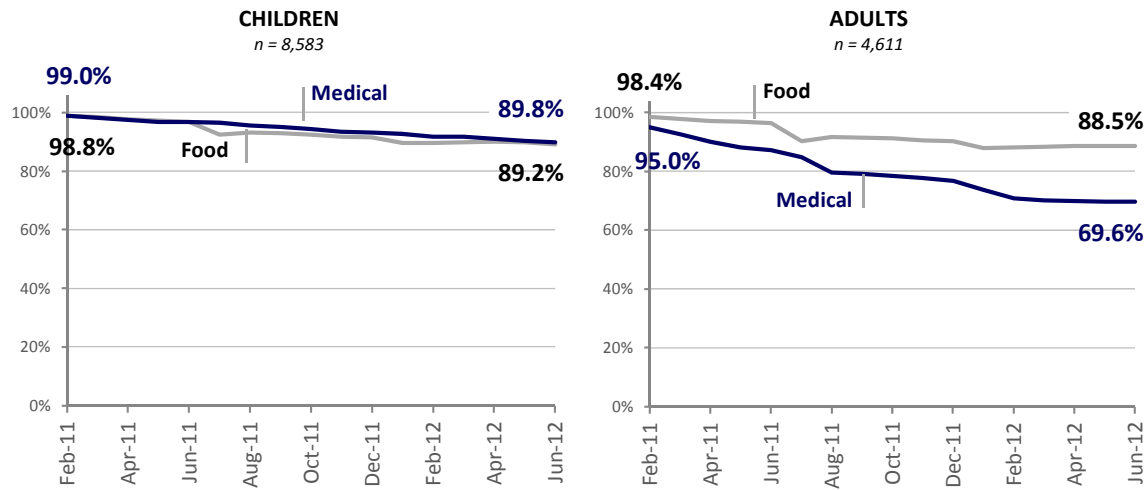

Homelessness, which includes doubling up with friends or relatives, as reported to case managers, rose gradually following the loss of TANF benefits from approximately 5 to 7 percent for children and from 7 to just under 11 percent for adults. During this period, homelessness increased among TANF recipients in general at about the same rate. Use of emergency housing assistance, however, did not increase over this time period. Specifically, the use of emergency shelters, transitional housing or the Homelessness Prevention and Rapid Re-housing program fluctuated around 3 to 4 percent for children and between 4 and 5 percent for adults in most months between February 2011 and June 2012.

Out-of-home placements for child welfare rose from 0.7 percent in February to 1.7 percent in June 2012 among children who remained off TANF and a small number who returned to economic assistance.

¹ *A Look at Adults and Children Terminated from TANF Due to Time Limits in February 2011*. This analysis is available at the RDA website: <http://publications.rda.dshs.wa.gov/1465/>.

² Data on receipt of housing assistance was obtained through a linkage to the Department of Commerce’s Homeless Management Information System (HMIS) for clients who gave consent to have their HMIS records shared with DSHS and had sufficient identifying information for linkage.

FOOD AND MEDICAL | Trends in Food and Medical Assistance since TANF Benefits were Terminated due to Time Limits

NOTE: Cases terminated from TANF due to time limits as of February 1, 2011 who did not return as of June 30, 2012

DATA SOURCE: ESA-EMAPS Assignment #2551 using the ACES Data Warehouse as of August 2012

TANF Clients Receiving Food Assistance

- The majority of both adults and children³ continued to receive Basic Food assistance, but there was a decline in the proportion of clients receiving these benefits.
- Among children, the Basic Food utilization rate declined by 9.6 percent, from 98.8 percent in February 2011 to 89.2 percent in June 2012.
- Over that same time period, the utilization rate among adults also declined by 9.9 percent, from 98.4 percent to 88.5 percent.

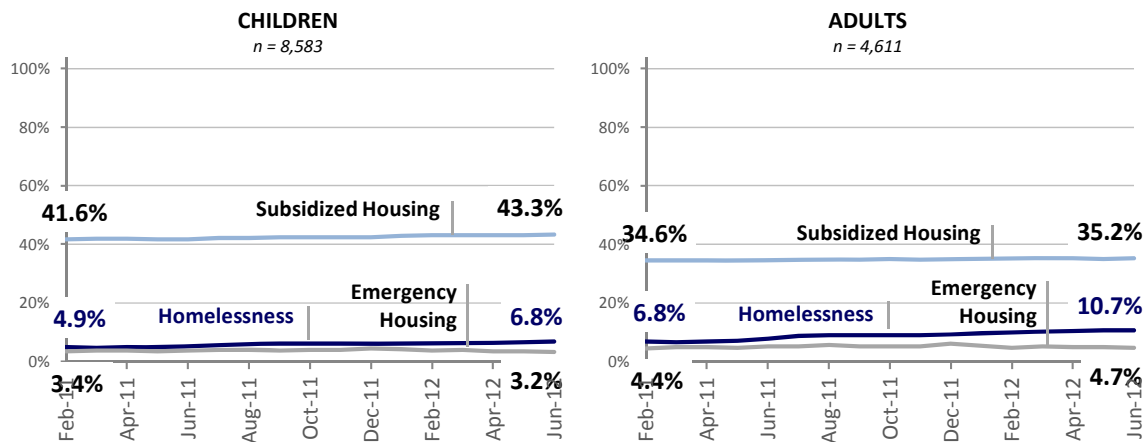

TANF Clients Receiving Medical Assistance

- The majority of both adults and children continued to receive medical assistance through the Health Care Authority,⁴ but the proportion of clients enrolled declined steadily in the 16-month follow-up period, with a more marked decrease among adults than among children.
- Among children, there was a 9.2 percent decline in medical coverage, from 99.0 percent in February 2011 to 89.8 percent in June 2012.
- Among adults, medical coverage declined by 25.4 percent (from 95.0 percent in February 2011 to 69.6 percent in June 2012).

³ Whether or not an individual is defined as a 'child' is determined by their relationship to the head of the household, as recorded in ACES, rather than by age.

⁴ These programs are Medicaid, SCHIP, and other state and federal medical assistance programs administered by the Health Care Authority, with the exception of Basic Health.

HOMELESSNESS AND HOUSING | Trends in Homelessness and Housing Support since TANF Benefits were Terminated due to Time Limits

NOTE: Cases terminated from TANF due to time limits as of February 1, 2011 who did not return as of June 30, 2012

DATA SOURCE: ESA-EMAPS Assignment #2551 using the ACES Data Warehouse as of August 2012

TANF Clients Receiving Subsidized Housing Assistance

- Over a third of both adults and children reported living in subsidized housing over the 16-month follow-up period.
- Among children, the percentage living in subsidized housing increased slightly over that same time period, from 41.6 percent to 43.3 percent.
- About 35 percent of adults consistently reported living in subsidized housing from February 2011 to June 2012.

TANF Clients Reporting Homelessness

- A relatively small proportion of both adults and children reported being homeless to an ESA caseworker. Although the rate of self-reported homelessness increased slightly over time for TANF leavers, the change was consistent with that found for TANF households overall.
- Among children who left TANF, the homeless rate increased by 1.9 percent, from 4.9 percent in February 2011 to 6.8 percent in June 2012.
- Among adults who had lost TANF benefits, the homeless rate increased by 3.9 percent, from 6.8 percent in February to 10.7 percent in June 2012.
- Among clients of all ages who left TANF in February 2011, the homeless rate increased by 2.6 percent, from 5.5 percent to 8.1 percent, roughly the same rate as the 2.4 percent increase in homelessness reported by all TANF households in the same time period.

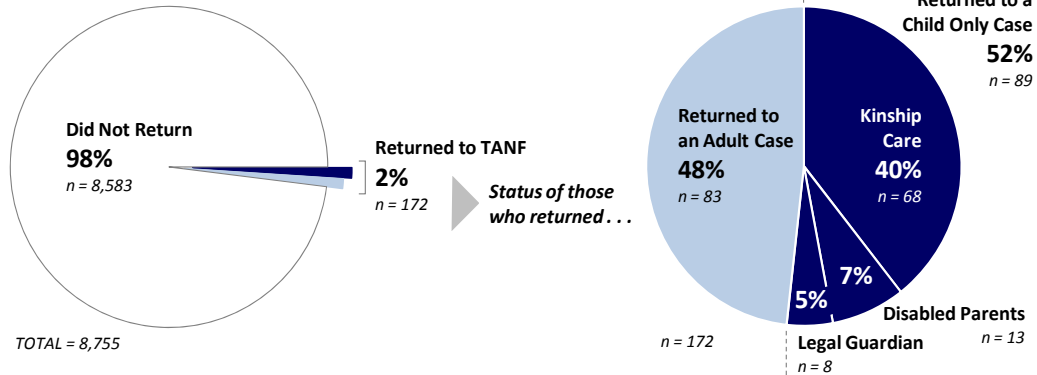

Emergency Housing Assistance (Any Type) of TANF Clients

- A small proportion of adults and children received emergency housing assistance through local housing providers, as recorded in the Commerce Department's Homeless Management Information System (HMIS). Emergency housing assistance included emergency shelter, transitional housing assistance, or Homelessness Prevention and Rapid Re-housing (HPRR).
- Among children, the percent who received emergency housing assistance ranged from 3.4 percent in February 2011 to 3.2 percent in June 2012, with no trend over time.
- Among adults, the percent using emergency housing programs was slightly higher than for children, ranging from 4.4 in February 2011 to 4.7 percent in June 2012 with no trend over time.

CHILDREN RETURNING | Children Who Returned to a TANF by Type of Case

- A small proportion of children—2 percent—who were initially terminated in February 2011 subsequently returned to TANF.
- A total of 172 children returned to TANF over the follow-up time period. Of these, 89 returned as a child-only TANF case and 83 returned in a different one-adult or two-adult TANF household.
- Among the children who returned as a child-only TANF case, 68 are in kinship care, 8 are with legal guardians, and 13 are with disabled parents.

All Children Terminated from TANF

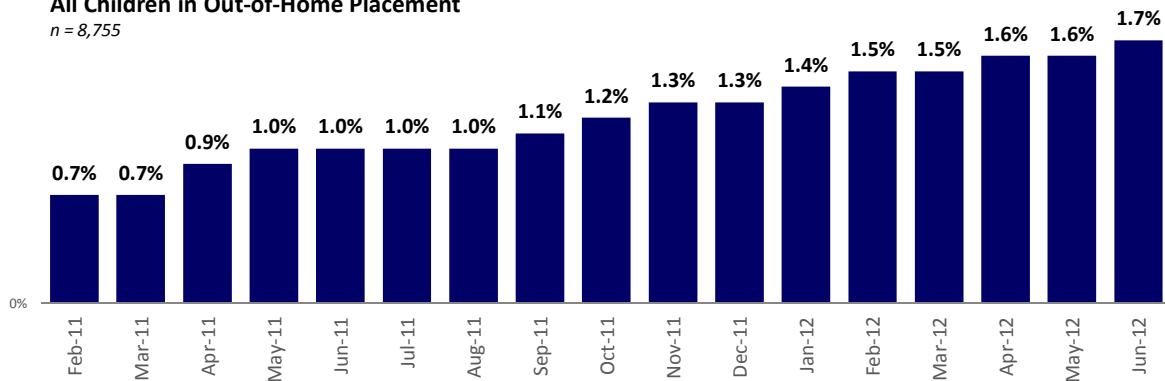

NOTE: Children who were terminated from TANF due to time limits as of February 1, 2011 who returned to other TANF benefits

OUT-OF-HOME PLACEMENTS | Children who Remained off TANF and Those Who Returned to Economic Assistance

- Only a small proportion of the 8,755 children who were either living in households that remained off TANF (n = 8,583) or who returned to economic assistance after termination of benefits (n = 172) were involved in out-of-home placements due to child welfare issues.
- The percent of children in out-of-home placements overall rose from 0.7 percent in February 2011 rising to 1.7 percent by June 2012.

All Children in Out-of-Home Placement

n = 8,755

Data Detail

1. TANF Clients Terminated Due to Time Limits as of February 1, 2011

¹ Self-reported information on homelessness and subsidized housing receipt are only recorded in ACES when clients are receiving public assistance from ESA. This information is thus unavailable for time-limited individuals who did not continue to receive any assistance from ESA following the termination of their TANF grant. With few exceptions, subsidized housing is coded on adult clients only and extrapolated here for children based on data available for adults in the household.

2. Returning Children - TANF Clients Terminated Due to Time Limits as of February 1, 2011

DATA SOURCE: ESA-EMAPS Assignment #2551 using the ACES Data Warehouse as of August 2012

	Returned to a Child Only Case						Returned to an Adult Case	
	Kinship Care		Legal Guardian		Disabled Parents		# of Children	% of Total
Total # of Returning Children ^{1,2}	# of Children	% of Total	# of Children	% of Total	# of Children	% of Total		
172	68	39.5%	8	4.7%	13	7.6%	83	48.3%

¹ These cases and clients were closed effective February 1 2011 and neither the AU or the clients reported receiving TANF assistance in the same assistance units between February and June 2012.

² These are children belonging to non-returning adults who have been terminated due to time limits. These children have returned to TANF on a separate child-only, one-adult, or two-adult Assistance unit.

3. Housing Assistance of TANF Clients Terminated as of February 1, 2011

DATA SOURCE: Washington State Homeless Management Information System (HMIS)
